

Thanks to National Lottery players, money is invested to help people across the UK explore, enjoy and protect the heritage they care about - from the archaeology under our feet to the historic parks and buildings we love, from precious memories and collections to rare wildlife.

Walton Hall Gardens has been awarded nearly two million pounds from the National Lottery via the Heritage Lottery Fund to transform and restore the historic conservatories into a dedicated learning centre.

The subjects taught at the new learning centre will include horticulture and animal care, with students carrying out project work on the Walton Estate and in the Children's Zoo as part of their course.

Walton Lea Partnership is a charity that provides supported employment for adults with learning disabilities, mental health problems, mobility issues and early onset of Alzheimer's.

Walton Lea Partnership's work will be carried out side by side with the College, allowing people of all ages and abilities to learn and thrive together.

The Friends of Walton Estate is an active volunteer group who share a common belief in the value of our open spaces and a particular love of Walton Estate. As part of the Heritage Lottery funded redevelopment of the Conservatory area, the Friends have agreed to put

together information about the Estate. There are already several useful publications but we will make information easily accessible to the public.
