In Warrington the main occupational group was Professional occupations (18.10%, compared with 22.72% in Culcheth, Glazebury and Croft). Across England the main occupational group was Professional occupations (17.49%).

## Deprivation

The Indices of Deprivation 2015 provide a set of relative measures of deprivation for small areas (Lower-layer Super Output Areas) across England, based on seven different domains of deprivation: Income Deprivation, Employment Deprivation, Education, Skills and Training Deprivation, Health Deprivation and Disability, Crime, Barriers to Housing and Services, Living Environment Deprivation. Each of these domains is based on a basket of indicators. As far as is possible, each indicator is based on data from the most recent time point available; in practice most indicators in the Indices of Deprivation 2015 relate to the tax year 2012/13.

Combining information from the seven domains produces an overall relative measure of deprivation, the Index of Multiple Deprivation. In addition, there are seven domain-level indices, and two supplementary indices: the Income Deprivation Affecting Children Index and the Income Deprivation Affecting Older People Index.

There are 32,844 small areas (Lower Super Output Areas or LSOAs) in England, each with an average of 1,500 residents. The Index of Multiple Deprivation ranks every small area in England from 1 (most deprived area) to 32,844 (least deprived area). This can be expressed as a 'national rank percentile' (where 0% is the most deprived and 100% is the least deprived). It is common to describe how relatively deprived a small area is by saying whether it falls among the most deprived 10 per cent, 20 per cent or 30 per cent of small areas in England (although there is no definitive cut-off at which an area is described as 'deprived').

## Culcheth, Glazebury and Croft Ward Profile 2015

The table below and map on the following page shows how small areas in Warrington compare for Multiple Deprivation. On the map the small areas coloured red are those with the most deprivation and small areas coloured dark green are those with the least deprivation. In the table each small area is presented alongside the national rank out of 32,844 small areas and the corresponding national rank percentile.

## Culcheth, Glazebury and Croft Ward Profile 2015

### Out of Work Benefits

Data from the Department for Work and Pensions show that in August 2015 there were 1,620 residents in Warrington claiming Job Seeker's Allowance (JSA) representing 1.1% of the population aged 16 to 64 years.

It is estimated that of these, 37 were living in Culcheth, Glazebury and Croft Ward, representing 0.5% of the population aged 16 to 64 years. The ward ranked 12 across the 22 wards of Warrington for JSA claims (where 1 is the worst-performing).

It should be noted that JSA claimant rates are falling, as claims to Universal Credit increase. Details of Universal Credit claims are not available at ward level.

In February 2015 there were 10,750 residents in Warrington claiming out of work benefits, representing 8.2% of the population aged 16 to 64 years. It is estimated that of these, 330 were living in Culcheth, Glazebury and Croft Ward, representing 4.6% of the population aged 16 to 64 years. The ward ranked 12 across the 22 wards of Warrington for out of work benefits (where 1 is the worst performing).

| Area                          | Total JSA claimants |        | Out of work benefit claimants |        |
|-------------------------------|---------------------|--------|-------------------------------|--------|
|                               | August 2015         |        | February 2015                 |        |
|                               | people              | % rate | people                        | % rate |
| Culcheth, Glazebury and Croft | 37                  | 0.5    | 330                           | 4.6    |
