Dear Sir,

I write in anticipation of saving Moore Nature Reserve.

This area is now a vital leisure area and could be in the future, meeting the leisure needs of the enlarged Warrington. At present you have a ready made green area. This surely is a unique selling point for future buyers.

I implore you not to destroy such an amenity,- not to mention the wild life that will be driven away, including the Great Crested Newt.

Please view this area as an asset and don't let us lose a well loved, healthy giving , established luxury.

Not at all incidentally, why is all the development coming south? 640 as opposed to 12,687 in the south. Discrimination.

Yours faithfully

Dear Sir,

I am writing to ask for your backing to save Moot Nature Reserve from development.

This area is a vital leisure place and is an asset for the future population of Warrington. An asset already established and loved, plus a haven for many species, including, I believe, the Great Crested Newt.

The Government need more houses to be built, but they also want a healthy population. I implore you to act to preserve this essential green space.

Yours faithfully,
[REDACTED]
