Why have Warrington chose to build so many houses and a new road down the trans Pennine way in Thelwall .If you build 8,000 houses and each house has 2 cars that's 16.000 extra cars on the roads .We need the fields and the trans Pennine way for walking and wild life and keeping fit less stress on hospitals There are buildings in Warrington already in a derelict state that needs demolishing were new houses could be built .Now you have drawn a red line on the map where you think the new road might go. The houses in this area will not be able to sell until this is all agreed .
