Warrington Borough Council Planning

I strongly object to the proposal of using the pennine trail as a road way which will creating more pollution from all the traffic that would be using this new road and I have no doubt the people living near to it will suffer with their health caused by the pollution and noise, Warrington is so polluted already and this would be adding to it Why do we have to have so many houses built in Warrington and taking what little green belt there is left I think Warrington Borough Council should be asking the government are these housing targets realistic as these figures were created before Britex The pennine trail is such a lovely natural walk way and cycle path use by hundreds of people on a regular basis and it brings people into Warrington from all over that can enjoy carefree cycling and walking away from all the traffic pollution and noise

Regards
