We wish to protest against the ill thought out development on the green belt to the south of Warrington.

The infrastructure in and around Stockton Heath is already crumbling. The A49 & A56 are congested at peak times and any incident on the M56 or M6 results in gridlock. There is no available land to provide extra parking and the Medical Centre is oversubscribed.

The suggestion to build houses on land between Red Lane and Houghs Lane will bring intolerable strain on both roads and bridges over the Bridgewater canal.

Moore Nature Reserve provides an important recreational area for walkers and cyclists and is a valuable habit for fauna & flora. The development of part of this site will destroy ancient woodland and remove a necessary breathing space. It is also a flood plain for the River Mersey which in times of rising sea levels is a vital asset.
