Hi,

I have just returned from the final consultation for the Local Plan 2017 at the Pyramid where I hoped to be furnished with further information concerning the proposal for a transport route along the disused railway embankment running along most of Saint Mary Street.

The council representatives I spoke too where not able to elaborate on the proposal citing that it was only a proposal and no decisions had been taken. The council has, by drawing a dotted line on a map, instilled a level of uncertainty concerning the future of Saint Mary Street.

This transport route if it becomes a definitive plan will have major implications for residents of Saint Mary Street.

I had intended to put my house on the market within the next 12 months, and the uncertainty this proposal has unleashed has already had, according to local estate agents, a negative impact on the local housing market which may affect these plans.
