

Objection to proposed local development plan.

I am writing to express my objection and concerns to the development plan around Stretton and Appleton areas

I don't agree with the proposed re use of greenbelt land for employment or the scale of housing proposed.

My reasons for this are many ,but centre around the already stretched locally community resources and roads for which the plan makes no real consideration.

Stockton heath is already over crowded with busy roads , the detrimental environmental effect to the area with this proposed plan will be of such a scale it could be considered a crime.

No greenbelt should be sacrificed for employment when there are so many other options locally , I cant see how the planners can reasonably claim or prove "exceptional circumstances" , where is the proof ?.

The areas local residents , including Stockton heath will be significantly negatively impacted with the vol of housing proposed in all forms

I'm not against sustainable quality homes being built in character with the area , I know theres always a demand but the scale proposed it too large and has to many negative impacts for this reason it need to be rethought and scaled down
