

To the PLANNING  
POLICY TEAM  
W. B. C.

Dear Members,

I wish to register my very strong objection to the proposed development plan for South Warrington.

In particular, I am especially concerned regarding the loss of precious green belt land and the impact a development of this size will have on local facilities including schools, health services and traffic congestion. It will destroy the environment - access to the countryside is a vital amenity and assists general health and well being of both young and old - once lost it cannot be recovered. The accepted need for new homes does not justify a development of this size and scale in S. Warrington - There are many different alternative less drastic and damaging solutions.

Yours faithfully,
