3rd attempt to send

[REDACTED]

I have sent this twice and it is bouncing back??

[REDACTED]

To whom it may concern

I would like to lodge my objection to the proposed development of Warrington Borough Council.

I feel that many people will object on moral grounds as they will feel extremely passionate about the area they live.

As I am fairly new to the area I don't have the connection for the area that many will have.

The points I would like to make are those that will directly impact myself. I do not believe that the council have exhausted the option prior to taking Greenbelt land and I understand this is a Government requirement. I moved here to have the countryside option but convenience of close proximity to a town. This area attracts many visitors who take advantage of the countryside and I feel that by taking that away those visitors will diminish thus affecting local businesses.

The traffic in the area can be unbelievable at times of any accidents on the major motorways which causes an increase of air pollution. The current road infrastructure causes a great deal on noise and air pollution which I believe already makes Warrington one of the worst places in the UK. The proposed new road development will add to both the air and noise pollution.

I do not think the proposals have followed the correct protocol in relation to green belt release or the consideration of air and noise pollution impacts. I also question the process of issuing the plans. I am in my [REDACTED] and struggled to make sense of the overlay maps and plans and feel that you have not been clear for those that are not able to access the internet or elderly.

I would like to see a copy of the process followed by the Council to arrive at selecting this as the preferred option .

Regards
