

Dear Sir :

re : Future house building in Lymm

I wish to object to the number of houses proposed for Lymm. Our roads are already oversubscribed with traffic, schools overstretched.

Past developments have been high density, with little regard to the visual impact on the surroundings nor the integrity of the village. Lack of parking is also a feature of these housing developments.

Historically Lymm has enjoyed a mix of green spaces between its wards, which should continue.

Everyone understands that nothing remains static, but building new homes should be done with thought and regard to the place and people already living there.

Yours sincerely
