Dear Sirs,

Please note my very strong objection to the development proposals for Lymm.

I understand some development is inevitable, but the infrastructure of the once 'village' simply cannot take such further planned development.

Open land and conservation sites are being unnecessarily eroded - seemingly purely based on profit as I understand proposals to building in the south provide more money than proposals to building in the north of Warrington.. Lymm is being used as a cash cow. More so now than ever.

Mature natural habitats will be eroded.

Open spaces need to be protected.

Traffic and parking are already major problems, huge problems with parking, absolutely no consideration has been given to this problem as it already stands! This should be addressed before generating even more vehicles!!

Schools are full. Primaries are full. The high school is full. The teachers have classes that are already bursting. Children will suffer, education lacking due to more and more children in classes, all with different needs and diversities.

Doctors, dentists and similar surgeries are already full. It is almost impossible to get a doctors appointment already.

The ridiculous proposal for HS2 coming through the area will have a huge additional negative impact- without any positives for this actual area and greenbelt land will be lost ... there should be consideration made for unnecessary further development in the area, as HS2 will already prove a huge problem and change the landscape for ever. Negatively.

Please note my strong objection, I have already completed the on line review objection.
