

[REDACTED]

Dear Sir/Madam

As a lifelong resident of Moore [REDACTED] I would like to express my deep concerns regarding the proposed loss of agricultural land (green belt) around the village.

No only have had to suffer the development of Sandymoor at one end of the village by Halton BC - which means that there are no farms / green belt at one end of the village at all - and we now have thousands of new homes and substantial increase in traffic cutting through the village, making it like a rat run. (Most of whom are speeding and have no concept of village life - horses/animals on the roads etc)

But now Warrington BC are threatening to completely swallow up the green belt at the other end of the village, with yet more new houses. hence increasing massively the traffic burden on the village.

MOORE as a village will lose its identity and become just one big sprawl of houses, which makes me very angry indeed.

I strongly disagree with any more building on green belt in this area, as I feel we have already absorbed more than our fair share from Halton BC - it is totally ridiculous that we are expected to get squashed out from both sides, with no breathing space whatsoever!

Moore village is home to many equine liveryes, [REDACTED] with many people owing the horses, who come to Moore to ride out. We have very little space to ride at present, and cannot get to any bridleways (which are currently very poorly maintained) without riding on roads to get there. We are constantly being villified by people in the new houses at sandymoor for having horses on the roads, and for any droppings on the roads. The horses were in this area and ridden on the land swallowed by the houses for many years prior to the development. What does Warrington BC intend to provide for our equine community?

- Loss of crop growing land
- Increase in Traffic
- Loss of Green space
- Loss of land/lanes to horse ride out.

Moore Village - the current countryside, nature reseve, canal, historic village and pub -is enjoyed by many WBC residents, even though it is not in WBC boundary, it immediately adjoins the boundary.

Port Warrington, is of huge concern to us, as the proposals to extend along the waterfront opposite the caravan park, will destroy the nature reserve as a place of beauty. It is somewhere that we currently use regularly to exercise our horses, as do many other people too, cyclers, dog walkers, bird watchers, etc. This is a devastating loss of land.
