

[REDACTED]

[REDACTED] WBC Head of Planning Policy

I would like to respond to the Local Plan Review.

This plan would completely change the character of the area where I live and destroy it's history and heritage. It is not 'spare' land, a lot of it is good agricultural land. Many small farms have been lost over the years and this plan would mean that there would be none left and our farmers would lose their livelihoods. We should look after our farms and help the farmers to improve their land.

With climate change forecast in the future these green and productive area are beneficial in many ways, for the whole areas healthy and well being, their loss would be regrettable . Air pollution is very worrying, we need to do everything possible to keep our air clean and these green areas help us all.

Greenbelt, green fields, woodlands and natural habitats, should be protected and improved for us all, to destroy them would be unacceptable and unnecessary.

Your Sincerely
