---

I am writing to protest in the strongest terms about the planned future development of what amounts to practically the whole of south Warrington. The scale of these plans is alarming to say the least. It will destroy green belt land and wildlife habitats. The building work alone will cause disruption on a massive scale and, when the new houses are occupied, the whole area will be completely transformed, with increased noise, pollution and litter. Services and utilities such as water supply and drains, will be severely affected as well. The roads and town centre are already congested especially the A49. Many houses these days have two or more cars so the traffic will be horrendous. I urge the council to rethink this plan and drastically reduce the scale of the building works.
