

[REDACTED]

I wish to object to the Preferred Development Option for the following reasons

The public consultation was chaotic , with unclear maps, conflicting and misleading information, and the questionnaire difficult to complete.

Homes are already blighted by something which may never happen.

No mention of HS2, or the effect the new bridge at Runcorn and new road to bypass bridge foot and how the port will affect the swing bridges. Get the infrastructure right first.

Warrington Hospital is to "consider a smaller purpose built hospital as more care will be delivered in the community. No specific locations have been considered as yet .
I quote "Your Hospitals Newsletter summer 2017."

This would free up more brownfield land with affordable house centrally, but affordable houses are needed in the outlying settlements as well. This would keep the character of the settlements.

It would be a better option to bring the tram from Altrincham through Lymm to Warrington than use the TPT for a road.

The Higher Lane plan for the entrance to the school, would seem a good plan for Lymm, as the school buses are a danger.

Yours
