

## English Indices of Deprivation 2015

### File 2 Domains of deprivation

The 'ID 2015 Domains' worksheet in this file contains the ranks and deciles for the Index of Multiple Deprivation 2015 (IMD 2015) and the seven domains at Lower-layer Super Output Area (LSOA) level.

For each measure, the LSOA with a **rank** of 1 is the most deprived and the LSOA with a rank of 32,844 is the least deprived.

The **deciles** are calculated by ranking the 32,844 LSOAs in England from most deprived to least deprived and dividing them into 10 equal groups. LSOAs in decile 1 fall within the most deprived 10% of LSOAs nationally and LSOAs in decile 10 fall within the least deprived 10% of LSOAs nationally.

The **Index of Multiple Deprivation (IMD)** is an overall relative measure of deprivation constructed by combining seven domains of deprivation according to their respective weights, as described below.

The seven domains of deprivation are as follows:

- The **Income Deprivation** Domain measures the proportion of the population experiencing deprivation relating to low income. The definition of low income used includes both those people that are out-of-work, and those that are in work but who have low earnings (and who satisfy the respective means tests).
- The **Employment Deprivation** Domain measures the proportion of the working-age population in an area involuntarily excluded from the labour market. This includes people who would like to work but are unable to do so due to unemployment, sickness or disability, or caring responsibilities.
- The **Education, Skills and Training Deprivation** Domain measures the lack of attainment and skills in the local population. The indicators fall into two sub-domains: one relating to children and young people and one relating to adult skills.
- The **Health Deprivation and Disability** Domain measures the risk of premature death and the impairment of quality of life through poor physical or mental health. The domain measures morbidity, disability and premature mortality but not aspects of behaviour or environment that may be predictive of future health deprivation.
- The **Crime** Domain measures the risk of personal and material victimisation at local level.
- The **Barriers to Housing and Services** Domain measures the physical and financial accessibility of housing and local services. The indicators fall into two sub-domains: 'geographical barriers', which relate to the physical proximity of local services, and 'wider barriers' which includes issues relating to access to housing such as affordability.
- The **Living Environment Deprivation** Domain measures the quality of the local environment. The indicators fall into two sub-domains. The 'indoors' living environment measures the quality of housing; while the 'outdoors' living environment contains measures of air quality and road traffic accidents.

**LSOAs** (Lower-layer Super Output Areas) are small areas designed to be of a similar population size, with an average of approximately 1,500 residents or 650 households. There are 32,844 Lower-layer Super Output Areas (LSOAs) in England. They were produced by the Office for National Statistics for the reporting of small area statistics.

Following the 2011 Census, the geography of Lower-layer Super Output Areas was revised and the number of areas has increased from 32,482 (as used for the Indices of Deprivation 2010, 2007 and 2004) to 32,844 (used for the Indices of Deprivation 2015). The boundaries of the vast majority (96 per cent) of these 32,844 areas are unchanged since the 2010, 2007 and 2004 Indices.

### About the English Indices of Deprivation 2015

The Indices of Deprivation 2015 provide a set of relative measures of deprivation for small areas (Lower-layer Super Output Areas) across England, based on seven domains of deprivation. The domains were combined using the following weights to produce the overall Index of Multiple Deprivation:

- Income Deprivation (22.5%)
- Employment Deprivation (22.5%)
- Education, Skills and Training Deprivation (13.5%)
- Health Deprivation and Disability (13.5%)
- Crime (9.3%)
- Barriers to Housing and Services (9.3%)
- Living Environment Deprivation (9.3%)

In addition to the Index of Multiple Deprivation and the seven domain indices, there are two supplementary indices: the Income Deprivation Affecting Children Index and the Income Deprivation Affecting Older People Index.

A range of summary measures are available for higher-level geographies including local authority districts and upper-tier local authorities, local enterprise partnerships, and clinical commissioning groups.

The Index of Multiple Deprivation, domain indices and the supplementary indices, together with the higher-level geography summaries, are collectively referred to as the Indices of Deprivation.

Chapter 3 of the Research Report gives advice on using and interpreting the data.

Most of the data used in the Indices of Deprivation 2015 relates to the tax year 2012/13 - see Chapter 4 of the Technical Report for more details.

All of the data files and supporting documents for the English Indices of Deprivation 2015 are available from: [www.gov.uk/government/statistics/english-indices-of-deprivation-2015](http://www.gov.uk/government/statistics/english-indices-of-deprivation-2015)

The Indices of Deprivation 2015 have been published using the Open Government License (OGL) version 3.0, see [www.nationalarchives.gov.uk/doc/open-government-licence/version/3/](http://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/)
