Dear Sir/Madam,

With regards to the above i didn't want to live in a "Garden city suburb" The plan to build so many houses is going

to cause increased pollution to an already highly polluted area, spoil the landscape using green belt land and increase the amount

of cars on the already congested roads.

The plan to use the old railway embankment and bridge at Latchford locks will cause pollution, noise and havoc to the

houses in its path.

Kind regards,

Dear Sir/Madam,

I have concerns over the use of stockton lane Grappenhall been used as a bus route. The lane is closed to any traffic at the moment . Why is it that it is proposed that buses may be able to use the lane as a route? Will cars then also be able to use the lane? I don't see the benefit of using this road for buses.

Kind regards,
