I am resending my objections to the above plan as it has come back as underliverable - also I have just found out from someone who works at Eddie Stobart that ALL employees have been made to submit a response in favour of the proposed plan whether or not they live in the area - otherwise they would lose their jobs!!!

I am writing to OBJECT in the strongest possible terms to the application made by Stobarts to destroy green belt land in south Warrington! As a local to the area we will be monumentally affected by any such agreement specifically with reference to the sheer volume of trucks/ lorries and extra cars on the roads having a detrimental impact to the air quality in the area. There is already major road traffic congestion at junction 20 of the m6 with lorries blocking local roads and services. It will also have a major impact on the local community at Appleton Thorn as we all know that Stretton road is used as a rat run when either the m6 or m56 or both motorways have an incident!! There appears to be little or no justification for the building of these massive warehouses when Warrington already has empty facilities in birch wood and winwick!!

As a local resident who pays council tax and road tax I urge you not to allow this massive destruction of green belt to go ahead.

Yours sincerely

Julie Hatton

Ps the reason I am emailing you is that I cannot find out how to object to the local plan on your website! Have you deliberately made it difficult to do this???
