Subject: Planning Application 2019/34739 Stobart.
Date: 31 May 2019 19:53:10

We wish to strongly object to the Stobart and six-56 logistics and distribution site.

Appleton Thorn is already a difficult place to enter/exit a fact which will be made worse by the building of more houses locally. The Stobart Project is to be built on prime farmland and greenbelt, and of itself will massively effect the M6 which is often severely congested and this proposal will make it worse. The volume of traffic will undoubtedly cause a further deterioration in air quality

Building so many houses in South Warrington is bad enough, adding the Stobart proposal is adding insult to injury to the residents in the area.

We ask those making decisions to be aware of the depth of feeling against this proposal, reject the proposal and save our greenbelt for current and future generations

Michael Jones
