I would like to make the following comments on the local plan.

- there are too many houses planned, especially in the south, garden suburb is meaningless nonsense - it is just another name for a big housing estate - which is over development. What houses are built should be affordable not expensive mansions. Most houses should be built on brown field sites that exist at present and those that will be created in the future as industry contracts.
- The green belt should be protected at all costs especially Moore Nature Reserve. The environment/climate change is top of the agenda at present, even councillors must be aware of this. Open spaces are good for mental health, well being, and exercise especially for our obese nation.
- Logistic sites provide very little employment, but create a lot of extra traffic, noise, pollution and congestion. A lot of new infra structure would be needed, there are times at present where it is already impossible to go over the roundabout at Pops Services.
- The character of local villages within the borough should be protected.
- As a plan that has been years in the making, it is very poor, unsound and badly thought out.

I look forward to the local elections when maybe we can get some councillors with more strategic awareness.
