---

Dear Sirs

Re the above proposal I write with my objections to the planned proposals as I cannot believe the council planning office can honestly have SOUND justification for these plans. Our objections are based on the below.

- To add another potential c9000 homes by 2037 on Green Belt land is madness. The area is already gridlocked, not just because of the bridges but general overload on the roads. You would be adding minimum 9000 additional cars (more realistically 18000 cars.)
- You could add 10 new bridge crossings but ultimately they all have to open when ships pass so adding just one is not going to address road overload unless the ship canal is not used which wont happen.
- The proposed M56/M6 commercial development with no new roads will add to the mayhem
- The areas is GREEN BELT and as such should remain otherwise we turn another area of beauty into another urban sprawl. If I wanted to live like this I would move to the city.

In summary I strongly believe the above proposal will bring nothing but gridlock to the areas roads and misery to those who live there.

Yours truly

Andrew Upton
