---

Dear Sirs,

I wish to register my opposition to the proposed Local Plan. The points

I wish to raise are as follows;

The planned expansion of employment areas will significantly increase traffic and hence pollution with subsequent impact on climate change. The loss of greenbelt will be detrimental to the local environment, green spaces are known to be beneficial to both physical and mental health of people.

The character of the local villages will be lost as they merge into a "sprawl".

It is not possible to verify the predicted growth in jobs and there is no justification for the increase in housing.

I hope that you will consider these points as you review the plan.

Regards

Pam Thomson
