

---

To Whom it May Concern,

I am writing to object to the PDO plans on the following grounds: -

- Brownfield sites should be exhausted before green field sites are lost forever for future generations
- The consultation process has been poorly handled and appears to be a tick box exercise with small venues being picked to control numbers. Obscure papers used to publicize consultations meetings. Why book the park royal and only have the room at minimum capacity. The online form seems to have been designed to put people off submitting objections by making it so complicated.
- On whose agenda are you working. You are in position to represent the wishes of the residents of Warrington, the people who pay your wages. Not to work on your own agenda. Where is there any evidence of preference of people who actually live in the areas who will be impacted by these proposals. All of this seems very positioned like a done deal
- On what evidence has the need for the numbers of new houses in the Appleton area been based, other than council aspiration as it appears in your own video
- The majority of residents in Warrington don't wish to become a City – again listen to the people who put you in these roles.
- Planning appears to still be being allowed with plans agreed for a large development in Thelwall/Grappenhall. If this is to be a coherent plan, all proposals should form part of this.
- The plans do not appear to be able to solve any traffic congestion, and that is before a ridiculous amount of houses are added into the equation.

The south of Warrington can no longer be bled dry to fund other areas of Warrington to have our services and school funding decreasing year on year. Then to try and generate more money by grossly over populating a small area is purely ridiculous

Regards
