Miss P Massey

Dear Sirs,

I have been reading the information concerning the new draft of the local plan, "South East Extension".

I have some issues with this plan, especially what concerns me is the use of so much greenbelt land when there is brownfield sites to be used. Looking at the plan we will lose the village communities because it will be one big suburban housing estate, with no infrastructure in place, we already have major traffic problems at certain times in the day and if there has been an accident on the M6 roads just come to a standstill. So much wildlife would be destroyed and the very essence of living semi rural will be non existence, our village way of life will disappear. I have watched as Barratts throw up their plaster board houses around this area chopped down beautiful old trees to put rows and rows of houses in a not so aptly named Orchard Meadows development. Will other builders get the chance to build nice homes or have Barratts got the monopoly for the land I wonder. Then we have the proposed Six56 adding HGVs and lorries to the lanes, surely this would be better placed on the Omega site.

I also noticed that the Grappenhall Hall land was earmarked as a park but now, surprise surprise, will be housing, we are so short of green space, you only have to visit Walton Gardens in the summer months to see how crowded it is, if all these new houses are built people will need green space/park to go to and the council's plan just does not take that into consideration.

I am honestly terrified of what the future will look like, this council seems set on destroying our way of life, our communities, our wildlife, how ironic when the focus of the world this week is climate change.

Please, please think again and revise this plan.

Yours faithfully

Miss Massey
