TITLE OF REPORT: 2025/26 TREASURY MANAGEMENT STRATEGY

#### 1. EXECUTIVE SUMMARY

- 1.1 The Council is required to produce a Treasury Management Strategy before the beginning of each financial year. Although the impact of treasury management decisions is considered over the long term, there is a requirement through regulations for the strategies to be approved annually.
- 1.2 The Local Government Act 2003 ("the Act") and the Regulations made under the Act require the Council to have regard to the Prudential Code for Capital Finance in Local Authorities and to set Prudential Indicators for the next three years to ensure that the Council's capital investment plans are affordable, prudent and sustainable. These are contained within this report.
- 1.3 The Act also requires the Council to set out a statement of its treasury management strategy for borrowing and to prepare an Annual Investment Strategy. This sets out the Council's policies for managing its investments and for giving priority to the security, liquidity and yield of those investments. The Treasury Management Strategy Statement, Annual Investment Strategy, and Minimum Revenue Provision (MRP) Policy Statement must both have regard to guidance issued by Ministry of Housing, Communities and Local Government (MHCLG).
- 1.4 This report sets out the Council's proposed Treasury Management Strategy Statement (TMSS) for the period 2025/26.
- 1.5 The Treasury Management Strategy forms part of the Council's overall budget setting and financial framework.
- 1.6 A key synopsis of key strategic points in the TMS is:
  - Prudential Indicators are given in Annex 2. A key indicator is the Authorised Limit which is the maximum the Council can borrow up to without further Full Council approval.

- Table at paragraph 3 summarises the Council's current borrowing and investment position.
- This strategy deals with Treasury Management only, all capital issues are dealt with in the Council's Capital Strategy which is reported separately to Full Council at their meeting of 24 February 2025.
- Over the next three years the Council are forecast to borrow a further £223m to fund the Capital Programme. £116m will be for loans to Housing Associations which is fully secure and generates a return to the Council and builds vital affordable homes. This may or may not be drawn down as it dependent on the Housings Association development plans. The remainder (£107m) is largely being used for highways schemes.
- Based on current interest rate forecasts the Council will borrow short term in 2025/26.
- Section 5 deals with Economic Background and forecasts used in formulating the strategy.
- Section 9 covers the Council's Investment Strategy and proposed counterparties and limits and credit criteria.
- The important and developing area of Environmental, Social and Governance (ESG) is dealt with in section 18.
- The Council's Minimum Revenue Provision (MRP) Policy is dealt with in section 21. MHCLG consulted on changes to MRP guidance and regulation, and these were implemented from 1 April 2024.
- Annexe A provides a glossary of terms.

#### 2. PURPOSE OF THE REPORT

2.1 This report sets out the Council's proposed Treasury Management Strategy for 2025/26 for Full Council to approve. The report was considered and approved by The Audit and Governance Committee at their meeting of 5 February 2025.

#### 3. BACKGROUND

- 3.1 The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management activities is to ensure that cash flow is adequately planned, with sufficient cash being available when it is required to meet payment obligations. Surplus monies are invested, in reliance upon the statutory investment power, in counterparties or instruments approved by the Council as being commensurate with its risk appetite.
- 3.2 Treasury management activity also incorporates financing the Council's capital activity that flows from its approved capital and non-treasury management investment plans, whether through the use of available resources, or through external borrowing. This element of activity seeks to balance aggregate borrowing needs over the longer term with the Council's Capital and Investment Strategy through arranging long and short term borrowing within a balanced risk portfolio approach. It may also be appropriate for certain loans taken out to be restructured in the future where variations in interest rate levels cause this to represent an appropriate risk balancing measure.

- 3.3 The contribution that the treasury management function makes to the Council is critical, as balancing the borrowing and investment operation ensures liquidity and the ability to meet spending commitments as they fall due, either for day-to-day revenue requirements or for larger capital transactions. The treasury operation seeks to optimise the effect of borrowing costs and investment income on the Council's resources, whilst having careful regard to inherent risks and security, liquidity and yield of investments. Since cash balances generally result from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will potentially result in a loss to the General Fund Balance.
- 3.4 Whilst any commercial initiatives or loans to third parties may impact on the treasury management function, these activities are referred to by CIPFA as "non-treasury management activities" and thereby considered separately from the more normal form of day-to-day treasury management activities.
- 3.5 CIPFA defines treasury management as:

"The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

- 3.6 The Treasury Management Strategy is drawn from the Council's Treasury Policy Statement and covers investments, borrowing, the outlook for interest rates, the management of associated risks, prudential indicators and the policy to be adopted on the Minimum Revenue Provision (MRP).
- 3.7 The Council's 2025/26 Treasury Management Strategy is attached at Appendix 1. Whilst endeavours are made to limit the technical content of the Strategy, it is by its nature necessary to include technical aspects. Additional explanations are therefore contained within the glossary of terms in Annexe A with a view to helping Members' understanding of certain technical terms contained in the Strategy.

#### 4. CONFIDENTIAL OR EXEMPT

4.1 Not confidential.

#### 5. FINANCIAL CONSIDERATIONS

5.1 Contained within the body of the strategy.

#### 6. LEGAL IMPLICATIONS

6.1 The Local Government Act 2003 provides that a local authority has the power both to borrow and invest money for any purpose relevant to its functions and for the prudent management of its financial affairs. The Act requires the Council to determine and to keep under review how much money it can afford to borrow. The Local Authorities (Capital Finance and Accounting) (England) Regulations 2003, provide that, in complying with this duty, the Council must have regard to the Prudential Code for Capital Finance in Local

Authorities published by CIPFA. The Council is also required to have regard to the CIPFA Treasury Management Code of Practice.

- 6.2 The current CIPFA Treasury Management Code of Practice 2021 and the Secretary of State's Investment Code both require the Section 151 Officer (Executive Director) to present an Annual Treasury Management Strategy Statement, which includes an Annual Investment Strategy, for the forthcoming year for approval by the Full Council before the beginning of each financial year.
- 6.3 The revised CIPFA Prudential Code for Capital Finance in Local Authorities sets out various indicators that are to be used to support capital expenditure plans and treasury management decisions. The prudential and treasury indicators have to be set by the Full Council when the budget is set and are monitored during the year. The prudential indicators are included in Annexe B of this report.

#### 7. RISK ASSESSMENT

7.1 Contained within the main body of the report.

#### 8. EQUALITY AND DIVERSITY/EQUALITY IMPACT ASSESSMENT

8.1 The Finance Service undertakes an Equality Impact Assessment (EIA) in its wider functions. Service changes that emerge from proposals contained in the treasury management strategy are subject to EI Assessments.

#### 9. CONSULTATION

9.1 Consultation has taken place with MUFG Corporate Markets (the Council's treasury management advisors) and the Council's Audit & Corporate Governance Committee at their meeting of 5 February 2025 in formulating this strategy.

#### 10. CLIMATE CHANGE IMPLICATIONS

10.1 There are no climate or ecological implications arising from this report; however, the council can make significant impact via future investment opportunities and operational changes.

#### 11. REASONS FOR RECOMMENDATIONS

11.1 To comply with the Local Government Act 2003, other regulations and guidance and to ensure that the Council's borrowing and investment plans are prudent, affordable and sustainable and comply with statutory requirements.

#### 12. RECOMMENDATIONS

12.1 Full Council approves the 2025/26 Treasury Management Strategy contained within appendix 1.

# 2025/26 COUNCIL'S TREASURY MANAGEMENT STRATEGY

#### 1. INTRODUCTION

- The Chartered Institute of Public Finance and Accountancy (CIPFA) published the revised Treasury Management Code and Prudential code on 20 December 2021 and has stated that revisions need to be included in the reporting framework from the 2023/24 financial year. This Council has to have regard to these codes of practice when it prepares the Treasury Management Strategy Statement and Annual Investment Strategy, and also related reports during the financial year, which are taken to Full Council for approval.
- 1.2 The revised codes will require the council to implement the following:
  - Adopt a new debt liability benchmark treasury indicator to support the financing risk management of the capital financing requirement; this is to be shown in chart form for a minimum of ten years;
  - Amendment to the knowledge and skills register for individual officers and members involved in the treasury management function to be proportionate to the size and complexity of the treasury management conducted by each council;
  - Reporting to members is to be done quarterly. Specifically, the Section 151 Officer
    is required to establish procedures to monitor and report performance against all
    forward-looking prudential indicators at least quarterly. The Section 151 Officer is
    expected to establish a measurement and reporting process that highlights
    significant actual or forecast deviations from the approved indicators. However,
    monitoring of prudential indicators, including forecast debt and investments, is not
    required to be taken to Full Council;
  - Environmental, Social and Governance (ESG) need to be addressed within the Treasury Management policies and practices (TMP 1);
  - An authority must not borrow to invest for the primary purpose of commercial return;
  - It is not prudent for local authorities to make any investment or spending decision that will increase the CFR, and so may lead to new borrowing, unless directly and primarily related to the functions of the authority, and where any commercial returns are either related to the financial viability of the project in question or otherwise incidental to the primary purpose;
  - An annual review should be conducted to evaluate whether commercial investments should be sold to release funds to finance new capital expenditure or refinance maturing debt;
  - A prudential indicator is required for the net income from commercial and service investments as a proportion of the net revenue stream;
  - Create new Investment Management Practices to manage risks associated with non-treasury investments;
  - Authorities with existing commercial investments (including property) are not required by this Code to sell these investments. Such authorities may carry out prudent active management and rebalancing of their portfolios.

#### 13 An authority's Capital Strategy or Annual Investment Strategy should include:

- The authority's approach to investments for service or commercial purposes (together referred to as non-treasury investments), including defining the authority's objectives, risk appetite and risk management in respect of these investments, and processes ensuring effective due diligence;
- An assessment of affordability, prudence and proportionality in respect of the authority's overall financial capacity (i.e. whether plausible losses could be absorbed in budgets or reserves without unmanageable detriment to local services);
- Details of financial and other risks of undertaking investments for service or commercial purposes and how these are managed;
- Requirements for independent and expert advice and scrutiny arrangements (while business cases may provide some of this material, the information contained in them will need to be periodically re-evaluated to inform the authority's overall strategy);
- State compliance with paragraph 51 of the Prudential Code in relation to investments for commercial purposes, in particular the requirement that an authority must not borrow to invest primarily for financial return.
- As this TMS and AIS deals solely with treasury management investments, the categories of service delivery and commercial investments should be addressed as part of the Capital Strategy report.

# 15 The revised Treasury Management Code requires all investments and investment income to be attributed to one of the following three purposes:

- Treasury Management arising from the organisation's cash flows or treasury risk
  management activity, this type of investment represents balances which are only
  held until the cash is required for use. Treasury investments may also arise from
  other treasury risk management activity which seeks to prudently manage the
  risks, costs or income relating to existing or forecast debt or treasury investments.
- **Service Delivery** investments held primarily and directly for the delivery of public services including housing, regeneration and local infrastructure. Returns on this category of investment which are funded by borrowing are permitted only in cases where the income is "either related to the financial viability of the project in question or otherwise incidental to the primary purpose".
- Commercial Return Investments held primarily for financial return with no treasury management or direct service provision purpose. Risks on such investments should be proportionate to an authority's financial capacity – i.e., that 'plausible losses' could be absorbed in budgets or reserves without unmanageable detriment to local services. An authority must not borrow to invest primarily for financial return.
- 1.6 The primary recommendations of the Treasury Management Code are as follows:
  - (i) Creation and maintenance of an annual Treasury Management Policy Statement,

- which sets out the policies and objectives of the Council's treasury management activities.
- (ii) Creation and maintenance of Treasury Management Practices, which set out the manner in which the Council will seek to achieve those policies and objectives:

#### (iii) Reporting Requirements

- Capital Strategy The CIPFA 2021 Prudential and Treasury Management Codes recommend that all local authorities prepare a capital strategy report which will provide the following: -
  - 1. A high-level long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services.
  - 2. An overview of how the associated risk is managed.
  - 3. The implications for future financial sustainability.
- The aim of the capital strategy is to ensure that all elected members of the Full Council understand the overall long-term policy objectives and resulting capital strategy requirements, governance procedures and risk appetite.

#### (iv) Treasury Management Reporting

- Full Council is currently recommended to receive and approve, as a minimum, three main reports each year (strategy, mid-year review and annual report on performance, detailed below) which should incorporate appropriate policies, together with estimates and actuals of associated activities.
- **Prudential and Treasury Indicators and Treasury Strategy** the first, and most important report covers:
  - 1. The capital plans (including prudential indictors);
  - 2. A Minimum Revenue Provision (MRP) Policy (how residual capital debt liability is charged to revenue over time);
  - 3. The Treasury Management Strategy (how the investments and borrowings are to be organised) including treasury indicators; and
  - 4. An Investment Strategy (the parameters on how investments are to be managed).
- A mid-year treasury management report this will update members with the progress of treasury management activity, amending prudential indicators as necessary, and identifying whether any policies require revision. In addition, the Council will receive quarterly update reports.
- An annual treasury report this provides details of a selection of actual prudential and treasury indicators and treasury operations compared with the estimates previously included within the strategy.
- (v) Delegation arrangements of responsibilities for implementing and monitoring treasury management policies and practices and for the execution and administration of treasury management decisions via the Treasury Management Practices Statement.
- (vi) Delegation by the Council of the role of scrutiny of the Treasury Management Strategy and policies to a specific named body. For this Council, the delegated body is the Audit and Corporate Governance Committee.

- (vii) Quarterly reports In addition to the three major reports detailed above, from 2024/25 quarterly reporting is also required. However, these additional reports do not have to be reported to Full Council/Board but do require to be adequately scrutinised. The Audit and Corporate Governance Committee undertake this role. (The reports, specifically, should comprise updated Treasury/Prudential Indicators.)
- 1.7 The Council's Capital Strategy for 2025/26 is due to be approved by Cabinet on 10 February 2025 and Full Council on 24 February 2025.
- 1.8 The suggested Strategy for 2025/26 in respect of the following aspects of the Treasury Management function is based upon the views of treasury officers regarding interest rates, supplemented with leading market forecasts provided by the Council's treasury advisor (MUFG Corporate Markets). The Strategy covers two main areas:

#### **Capital issues**

- The capital investment plans and the associated prudential indicators
- The Minimum Revenue Provision (MRP) Policy

#### **Treasury Management issues**

- The current treasury position
- Treasury indicators which limit the treasury risk arising from activities of the Council
- Prospects for interest rates
- The borrowing strategy
- Policy on borrowing in advance of need
- Debt rescheduling opportunities
- The investment strategy
- ESG Policy
- Creditworthiness policy
- Policy on use of external service providers
- Future developments

These elements reflect the Council having had regard to the requirements and recommendations of the Local Government Act 2003, the CIPFA Prudential Code, the MHCLG MRP Guidance, the CIPFA Treasury Management Code and the MHCLG Investment Guidance.

- 1.9 Separately, Section 32 of the Local Government Finance Act 1992 requires the Section 151 Officer of the Authority to calculate and report upon its budget requirement for each financial year, and the adequacy of proposed financial reserves, to include the revenue costs which flow from capital financing decisions.
- 1.10 Section 3 of the Local Government Act 2003 requires that the Council must determine and keep under review how much money it can afford to borrow. In order to do this, it must have regard to the Prudential Code in order to determine an Affordable Borrowing Limit.
- 1.11 In general, the Prudential Code recommendations provide for close scrutiny and monitoring of capital investment plans in order to achieve a balance between investment needs and associated revenue consequences.

- 1.12 **Training**: The CIPFA Code requires the responsible officer (Section 151 Officer) to ensure that members with responsibility for treasury management receive adequate training. This especially applies to members of the Audit & Corporate Governance Committee (A&CGC) who are responsible for scrutiny of treasury management. Both internal and external training courses are provided to members. Member training is a key theme from CIPFA and the Ministry of Housing, Communities and Local Government (MHCLG). During 2025/26 a comprehensive training programme will be offered to all members and the training needs of treasury management officers are periodically reviewed.
- 1.13 Furthermore, pages 47 and 48 of the Code state that they expect "all organisations to have a formal and comprehensive knowledge and skills or training policy for the effective acquisition and retention of treasury management knowledge and skills for those responsible for management, delivery, governance and decision making.
- 1.14 The scale and nature of this will depend on the size and complexity of the organisation's treasury management needs. Organisations should consider how to assess whether treasury management staff and board/Council members have the required knowledge and skills to undertake their roles and whether they have been able to maintain those skills and keep them up to date.
- 1.15 As a minimum, authorities should carry out the following to monitor and review knowledge and skills:
  - Record attendance at training and ensure action is taken where poor attendance is identified;
  - Prepare tailored learning plans for treasury management officers and board/council members;
  - Require treasury management officers and board/council members to undertake self- assessment against the required competencies;
  - Have regular communication with officers and board/council members, encouraging them to highlight training needs on an ongoing basis."
- 1.16 In further support of the revised training requirements, CIPFA's Better Governance Forum and Treasury Management Network have produced a 'self-assessment by members responsible for the scrutiny of treasury management', which is available from the CIPFA website to download. This will be circulated to members of the Audit & Corporate Governance Committee on an annual basis. A formal record of the training received by officers central to the Treasury function will be maintained by the Treasury Team. Similarly, a formal record of the treasury management/capital finance training received by members will also be maintained by Democratic Services.

#### 2. TREASURY LIMITS FOR 2025/26

21 It is a statutory duty, under Section 3 of LGA 2003 and supporting regulations, for the Council to determine and keep under review how much it can afford to borrow. The amount so determined is termed the 'Affordable Borrowing Limit'. The Authorised Limit arising under the Prudential Code is intended to enable the statutory affordability requirement to be complied with.

- The Council must have regard to the Prudential Code when setting its Affordable Borrowing Limit (ABL). This essentially requires it to ensure that total capital investment remains within sustainable limits and in particular, that the impact upon its future council tax and council rent levels is 'acceptable'.
- Whilst termed an "Affordable Borrowing Limit", its extent represents mainly the Council's underlying capital investment "debt" liability, whether or not this is fully financed from external borrowing at any moment in time (e.g. the Council may on occasion use its own resources to finance new capital investment liabilities, rather than investing the monies externally). This underlying capital investment liability may also include any "credit arrangements" entered into by the Council, such as arise from leases. The ABL is determined at least annually, on a rolling basis, for the forthcoming financial year and two successive financial years.
- 24 Prudential and Treasury Indicators identified at Annexe B are relevant for the purposes of setting an integrated Treasury Management Strategy.

#### 3. CURRENT PORTFOLIO POSITION

3.1 The Council's treasury and non-treasury portfolio position as at 31 December 2024 comprised of:

	Balance	Balance	Movement
	31 March 2024	31 December 2024	in period
Council Treasury Portfolio	£m	£m	£m
Council Borrowing			
- short-term temporary borrowing	20.316	19.771	-0.545
- long-term borrowing	1,871.404	1,741.523	-129.881
Total Debt	1,891.721	1,761	-130.426
Council Investments			
- deposits with various investment funds	-131.122	-301.187	-170.065
Total Investments	-131.122	-301.187	-170.065
Net Borrowing	1,760.599	1,460.108	-300.491

#### **BORROWING REQUIREMENT**

- 32 The capital investment plans provide details of the service and non-treasury management investment activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet these activities arising under the Council's Capital Strategy. The Strategy covers the relevant treasury/prudential indicators, the current and projected debt positions and the Annual Investment Strategy. The Council's capital investment plans are the key driver of treasury management activity.
- 33 The output of the capital investment plans is reflected in prudential indicators, which are designed to assist members' overview of performance.
- The table below sets out the Council's future borrowing requirement (current and previous year are shown for comparison) based on current commitments and plans.

2023/24 Actual £m	2024/25 MTFP £m	2024/25 Estimate £m	Capital Investment	2025/26 Estimate £m	2026/27 Estimate £m	2027/28 Estimate £m	TOTAL 3 Years £m
189.979	258.912	165.077	Capital Expenditure	174.791	70.403	58.680	303.874
			Financed By:				
36.044	71.836	28.433	Capital Grants & Reserves	55.510	4.875	7.479	67.864
1.872	3.183	49.670	Capital Receipts	0.902	2.150	0	3.052
9.616	0	0.190	Council Revenue Funding	0	0	0	0
0.699	4.461	5.001	External Funding	7.063	2.022	0.468	9.553
141.748	179.432	81.783	Financing need for year	111.316	61.356	50.733	223.405

- 4. PROSPECTS FOR INTEREST RATES please note: The forecast interest rates and economic date has been provided as at 11 November 2024 for the report by MUFG Corporate Markets (the Council's Treasury Management Advisors). The information is provided to members for their general understanding when reviewing the report, but members should also have regard to the continuing changes to economic data.
- 4.1 The Council has appointed MUFG Corporate Markets as its external treasury management advisor and part of their service is to assist the Council to formulate a view on interest rates.
- The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon the services of our external service providers. All decisions will be undertaken with regards to all available information, including, but not solely, the treasury advisers.
- The Council recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented and subjected to regular review.

- Following the 30 October Budget, the outcome of the US Presidential election on 6 November, and the 25bps Bank Rate cut undertaken by the Monetary Policy Committee (MPC) on 7 November, we have significantly revised our central forecasts for the first time since May. In summary, MUFG's Bank Rate forecast is now 50bps 75bps higher than was previously the case, whilst MUFG's PWLB forecasts have been materially lifted to not only reflect MUFG's increased concerns around the future path of inflation, but also the increased level of Government borrowing over the term of the current Parliament.
- MUFG's central case of the 30 October Budget is that those policy announcements will be inflationary, at least in the near-term. The Office for Budgetary Responsibility and the Bank of England concur with that view. The latter have the CPI measure of inflation hitting 2.5% y/y by the end of 2024 and staying sticky until at least 2026. The Bank forecasts CPI to be 2.7% y/y (Q4 2025) and 2.2% (Q4 2026) before dropping back in 2027 to 1.8% y/y.
- There are inherent risks to all of the above. The worst-case scenario would see systemic blockages of planning permissions and the inability to identify and resource the additional workforce required to deliver large-scale IT, housing and infrastructure projects. This would lead to upside risks to inflation, an increased prospect of further Government borrowing & tax rises, and a tepid GDP performance.
- 4.7 MUFG's central view is that monetary policy is sufficiently tight at present to cater for some further moderate loosening, the extent of which, however, will continue to be data dependent. We forecast the next reduction in Bank Rate to be made in February and for a pattern to evolve whereby rate cuts are made quarterly and in keeping with the release of the Bank's Quarterly Monetary Policy Reports (February, May, August and November).
- Any movement below a 4% Bank Rate will, nonetheless, be very much dependent on inflation data in the second half of 2025. The fact that the November MPC rate cut decision saw a split vote of 8-1 confirms that there are already some concerns around inflation stickiness, and with recent public sector wage increases beginning to funnel their way into headline average earnings data, the market will be looking very closely at those releases.
- 49 MUFG's PWLB forecast, the short to medium part of the curve is forecast to remain elevated over the course of the next year, and the degree to which rates moderate will be tied to the arguments for further Bank Rate loosening or otherwise. The longer part of the curve will also be impacted by inflation factors, but there is also the additional concern that with other major developed economies such as the US and France looking to run large budget deficits there could be a glut of government debt issuance that investors will only agree to digest if the interest rates paid provide sufficient reward for that scenario.
- 4.10 The US President election and Donald Trump's victory paves the way for the introduction/extension of tariffs that could prove inflationary, whilst the same could be said of further tax cuts and an expansion of the current US budget deficit. Invariably the direction of US Treasury yields in reaction to Trump's core policies will, in all probability, impact UK gilt yields. So, there are domestic and international factors that could impact PWLB rates whilst, as a general comment, geo-political risks abound in Europe, the Middle East and Asia.
- 4.11 MUFG's revised PWLB rate forecasts below are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1 November 2012.

Please note, the lower Housing Revenue Account (HRA) PWLB rate started on 15 June 2023 for those authorities with an HRA (standard rate minus 60 bps).

## **MUFG Capital Markets - interest rate forecast**

The following table gives their view:

	PWLB Borrowing Rates				
	5 year	10 year	25 year	50 year	
Dec-24	5.00	5.30	5.60	5.40	
Mar-25	4.90	5.10	5.50	5.30	
June-25	4.80	5.00	5.40	5.20	
Sept-25	4.60	4380	5.30	5.10	
Dec-25	4.50	4.80	5.20	5.00	
Mar-26	4.50	4.70	5.10	4.90	
June-26	4.40	4.50	5.00	4.80	
Sept-26	4.30	4.50	4.90	4.70	
Dec-26	4.20	4.40	4.80	4.60	
Mar-27	4.10	4.30	4.70	4.50	
June-27	4.00	4.20	4.60	4.40	
Sept-27	4.00	4.20	4.50	4.30	
Dec-27	3.90	4.10	4.50	4.30	

#### 4.12 PWLB Rates

The overall longer-run trend is for gilt yields and PWLB rates to fall back over the timeline of our forecasts, but the risks to our forecasts are to the upsides. Our target borrowing rates are set two years forward (as we expect rates to fall back) and the current PWLB (certainty) borrowing rates are set out below:

PWLB debt	Current borrowing rate as at 11.11.24 p.m.	Target borrowing rate now (end of Q3 2026)	Target borrowing rate previous (end of Q3 2026)
5 years	5.02%	4.30%	3.90%
10 years	5.23%	4.50%	4.10%
25 years	5.66%	4.90%	4.40%
50 years	5.42%	4.70%	4.20%

**Borrowing advice:** MUFG's long-term (beyond 10 years) forecast for Bank Rate has increased to 3.25% from 3%. As all PWLB certainty rates are currently significantly above this level, borrowing strategies will need to be reviewed in that context. Overall, better value can generally be obtained at the shorter end of the curve and short-dated fixed LA to

LA monies should be considered. Temporary borrowing rates will generally fall in line with Bank Rate cuts.

4.14 MUFG's suggested budgeted earnings rates for investments up to about three months' duration in each financial year are set out below:

Average earning in each year	%
2024/25	4.60
2025/26	4.10
2026/27	3.70
2027/28	3.50
2028/29	3.50
Years 6 to 10	3.50
Years 10+	3.50

- Economic and market developments will continue to be monitored as they unfold. Typically, forecasts are reviewed following the quarterly release of the Bank of England's Monetary Policy Report, but that position will be reviewed on an ad hoc basis as and if required.
- Interest rate forecast for Bank Rate is in steps of 25 bps, whereas PWLB forecasts have been rounded to the nearest 10 bps and are central forecasts within bands of + / - 25 bps. Naturally, events will be monitored, and the forecast will be updated as and when appropriate.

#### 5. ECONOMIC BACKGROUND

- 5.1 The third quarter of 2024 (July to September) saw:
- 52 GDP growth stagnating in July following downwardly revised Q2 figures (0.5% q/q);
- A further easing in wage growth as the headline 3myy rate (including bonuses) fell from 4.6% in June to 4.0% in July;
- 5.4 CPI inflation hitting its target in June before edging above it to 2.2% in July and August;
- 55 Core CPI inflation increasing from 3.3% in July to 3.6% in August;
- 5.6 The Bank of England initiating its easing cycle by lowering interest rates from 5.25% to 5.0% in August and holding them steady in its September meeting;
- 5.7 10-year gilt yields falling to 4.0% in September.
- The economy's stagnation in June and July points more to a mild slowdown in GDP growth than a sudden drop back into a recession. Moreover, the drop in September's composite activity Purchasing Managers Index, from 53.8 in August to 52.9, was still consistent with GDP growth of 0.3%-0.4% for the summer months. This is in line with the Bank of England's view, and it was encouraging that an improvement in manufacturing output growth could

be detected, whilst the services PMI balance suggests non-retail services output grew by 0.5% q/q in Q3. Additionally, the services PMI future activity balance showed an uptick in September, although readings after the Chancellor's announcements at the Budget on 30th October will be more meaningful.

- The 1.0% m/m jump in retail sales in August was stronger than the consensus forecast for a 0.4% m/m increase. The rise was reasonably broad based, with six of the seven main sub sectors recording monthly increases, though the biggest gains came from clothing stores and supermarkets, which the ONS reported was driven by the warmer-than-usual weather and end of season sales. As a result, some of that strength is probably temporary.
- The Government's plans to raise public spending by around £16bn a year (0.6% GDP) have caused concerns that a big rise in taxes will be announced in the Budget, which could weaken GDP growth in the medium-term. However, if taxes are raised in line with spending (i.e., by £16bn) that would mean the overall stance of fiscal policy would be similar to the previous government's plan to reduce the budget deficit. Additionally, rises in public spending tend to boost GDP by more than increases in taxes reduce it. Our colleagues at Capital Economics suggest GDP growth will hit 1.2% in 2024 before reaching 1.5% for both 2025 and 2026.
- The further easing in wage growth will be welcomed by the Bank of England as a sign that labour market conditions are continuing to cool. The 3myy growth rate of average earnings fell from 4.6% in June to 4.0% in July. On a three-month annualised basis, average earnings growth eased from 3.0% to 1.8%, its lowest rate since December 2023. Excluding bonuses, the 3myy rate fell from 5.4% to 5.1%.
- Other labour market indicators also point to a further loosening in the labour market. The 59,000 fall in the alternative PAYE measure of the number of employees in August marked the fourth fall in the past five months. And the 77,000 decline in the three months to August was the biggest drop since November 2020. Moreover, the number of workforce jobs fell by 28,000 in Q2. The downward trend in job vacancies continued too. The number of job vacancies fell from 872,000 in the three months to July to 857,000 in the three months to August. That leaves it 34% below its peak in May 2022, and just 5% above its pre-pandemic level. Nonetheless, the Bank of England is still more concerned about the inflationary influence of the labour market rather than the risk of a major slowdown in labour market activity.
- CPI inflation stayed at 2.2% in August, but services inflation rose from a two-year low of 5.2% in July to 5.6%, significantly above its long-run average of 3.5%. Food and fuel price inflation exerted some downward pressure on CPI inflation, but these were offset by the upward effects from rising furniture/household equipment inflation, recreation/culture inflation and a surprisingly large rise in airfares inflation from -10.4% in July to +11.9% in August. As a result, core inflation crept back up from 3.3% to 3.6%. CPI inflation is also expected to rise in the coming months, potentially reaching 2.9% in November, before declining to around 2.0% by mid-2025.
- 5.14 The Bank initiated its loosening cycle in August with a 25bps rate cut, lowering rates from

5.25% to 5.0%. In its September meeting, the Bank, resembling the ECB more than the Fed, opted to hold rates steady at 5.0%, signalling a preference for a more gradual approach to rate cuts. Notably, one Monetary Policy Committee (MPC) member (Swati Dhingra) voted for a consecutive 25bps cut, while four members swung back to voting to leave rates unchanged. That meant the slim 5-4 vote in favour of a cut in August shifted to a solid 8-1 vote in favour of no change.

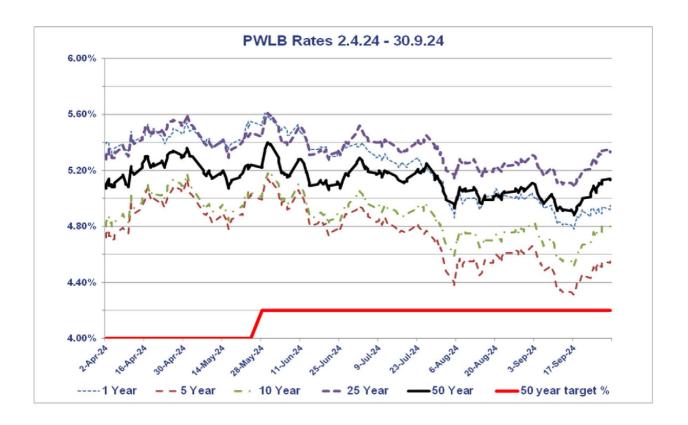

- Looking ahead, CPI inflation will likely rise in the coming months before it falls back to its target of 2.0% in mid-2025. The increasing uncertainties of the Middle East may also exert an upward pressure on inflation, with oil prices rising in the aftermath of Iran's missile attack on Israel on 1 October. China's recent outpouring of new fiscal support measures in the latter stages of September has also added to the upshift in broader commodity prices, which, in turn, may impact on global inflation levels and thus monetary policy decisions. Despite these recent developments, our central forecast is still for rates to fall to 4.5% by the end of 2024 with further cuts likely throughout 2025. This is in line with market expectations, however, although a November rate cut still looks likely, December may be more problematic for the Bank if CPI inflation spikes towards 3%. In the second half of 2025, though, we think a more marked easing in inflation will prompt the Bank to speed up, resulting in rates eventually reaching 3.0%, rather than the 3.25-3.50% currently priced in by financial markets.
- 5.16 Our forecast is next due to be updated around mid-November following the 30 October Budget, 5 November US presidential election and the 7 November MPC meeting and the release of the Bank of England Quarterly Monetary Policy Report.
- Looking at gilt movements in the first half of 2024/25, and you will note the 10-year gilt yield declined from 4.32% in May to 4.02% in August as the Bank's August rate cut signalled the start of its loosening cycle. Following the decision to hold the Bank Rate at 5.0% in September, the market response was muted, with the 10-year yield rising by only 5bps after the announcement. This likely reflected the fact that money markets had priced in a 25% chance of a rate cut prior to the meeting. The yield had already increased by about 10bps in the days leading up to the meeting, driven in part by the Fed's "hawkish cut" on 18 September. There is a possibility that gilt yields will rise near-term as UK policymakers remain cautious due to persistent inflation concerns, before declining in the longer term as rates fall to 3.0%.
- The FTSE 100 reached a peak of 8,380 in the third quarter of 2024, but its performance is firmly in the shade of the US S&P500, which has breached the 5,700 threshold on several occasions recently. Its progress, however, may pause for the time being whilst investors wait to see who is elected the next US President, and how events in the Middle East (and Ukraine) unfold. The catalyst for any further rally (or not) is likely to be the degree of investors' faith in AI.

#### MPC meetings: 9 May, 20 June, 1 August, 19 September 2024

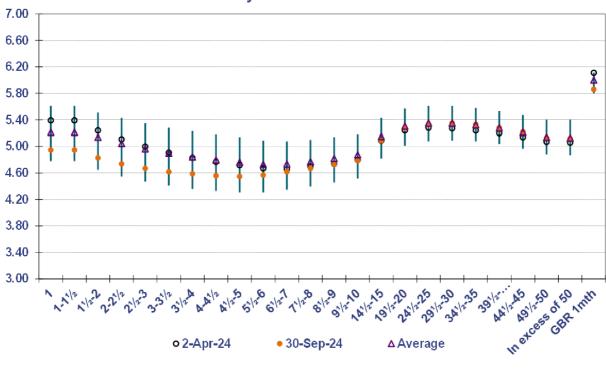

5.19 On 9 May, the Bank of England's Monetary Policy Committee (MPC) voted 7-2 to keep Bank Rate at 5.25%. This outcome was repeated on 20 June.

- 520 However, by the time of the August meeting, there was a 5-4 vote in place for rates to be cut by 25bps to 5%. However, subsequent speeches from MPC members have supported Governor Bailey's tone with its emphasis on "gradual" reductions over time.
- Markets thought there may be an outside chance of a further Bank Rate reduction in September, following the 50bps cut by the FOMC, but this came to nothing.
- Nonetheless, November still looks most likely to be the next month to see a rate cut to 4.75% but, thereafter, inflation and employment data releases, as well as geo-political events, are likely to be the determinant for what happens in the remainder of 2024/25 and into 2025/26.

In the chart below, despite a considerable gilt market rally in mid-September, rates started and finished the six-month period under review in broadly the same position.

PWLB Certainty Rate Variations 2.4.24 to 30.9.24

## HIGH/LOW/AVERAGE PWLB RATES FOR 02.04.24 - 30.09.24

	1 Year	5 Year	10 Year	25 Year	50 Year

Spread	0.83%	0.83%	0.66%	0.53%	0.52%

#### 6. BORROWING STRATEGY

- The capital investment plans provide details of the anticipated spending and non-treasury investment activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to facilitate this joint nature of activity. This will involve both the organisation of the cash flow and, where capital investment plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury/prudential indicators, the current and projected debt positions and the annual investment strategy.
- In general, the Council will borrow for one of two purposes to finance cash flow in the short-term or to fund capital investment over the longer term.
- The Council's treasury portfolio position at 31 March 2024, with forward projections is stated below for the forthcoming years and detailed in table 3.4. The actual external borrowing (under treasury management operations), against the underlying capital borrowing need (the Capital Financing Requirement (CFR), highlights an underlying need to borrow £111.316m in 2025/26, £61.356m in 2026/27 and £50.733m 2027/28. There is a large requirement in the early years. This is due to the impact of new capital investment schemes in the programme. More detail on capital expenditure can be found in the Council's Capital Strategy which will be presented to Full Council for approval on 24 February 2025.
- A key aim of the Treasury Management Strategy is to minimise the cost of the Council's external borrowing (portfolio), through seeking to spread the period for which loans are raised so as to avoid any undue fluctuation on interest costs arising from the future need to replace earlier amounts borrowed.
- Currently the average rate of interest on the Council's loan portfolio is 3% which is considered to be a beneficially low rate. The achievement of such low average rate demonstrates how the Council benefits from the best value for money in terms of its borrowing. This is the result of a number of years proactively managing the portfolio on loans through restructuring and taking advantage of the best possible interest rates available. The proposed treasury management strategy aims to continue this successful approach.
- The approved sources of long-term and short-term borrowing will be:
  - Public Works Loan Board
  - UK Local Authorities
  - Municipal Bond Agency
  - Any institution approved for investments including high quality supranational banks
  - European Banks Green Sustainable Bond Issuances
  - World Wide Banks Green Sustainable Bond Issuances
  - UK public and private sector pension funds
  - Insurance companies
  - UK Infrastructure Bank
  - Any other financial institution approved by the Prudential Regulation Authority,

which is part of the Bank of England and is responsible for the regulation and supervision of banks, building societies, credit unions, insurers and major investment firms

- Capital market bond investors either over the counter or through electronic trading platforms
- Community Municipal Bonds
- Local Bonds
- Local authority bills
- Overdraft
- Negotiable Bonds
- Internal (capital receipts and revenue balances)
- Commercial Paper
- Medium Term Notes
- Finance leases
- 67 New financial institutions as a source of borrowing and / or types of borrowing currently the PWLB Certainty Rate is set at gilts+ 80bps. However, consideration may still need to be given to sourcing funding from the following:
  - Local authorities primarily shorter dated maturities out to 3 years or so still cheaper than the Certainty Rate
  - Financial institutions primarily insurance companies and pension funds but also some banks, out of forward dates where the objective is to avoid a "cost of carry" or to achieve refinancing certainty over the next few years
  - Municipal Bonds Agency possibly still a viable alternative depending on market circumstances prevailing at the time.

The PWLB rate forecasts are given in the table below. The current forecast shows that rates are expected to fall gradually over the next three years.

	PWLB Borrowing Rates			
		T	T	T
	5 year	10 year	25 year	50 year
Dec-24	5.00	5.30	5.60	5.40
Mar-25	4.90	5.10	5.50	5.30
June-25	4.80	5.00	5.40	5.20
Sept-25	4.60	4380	5.30	5.10
Dec-25	4.50	4.80	5.20	5.00
Mar-26	4.50	4.70	5.10	4.90
June-26	4.40	4.50	5.00	4.80
Sept-26	4.30	4.50	4.90	4.70
Dec-26	4.20	4.40	4.80	4.60
Mar-27	4.10	4.30	4.70	4.50
June-27	4.00	4.20	4.60	4.40
Sept-27	4.00	4.20	4.50	4.30
Dec-27	3.90	4.10	4.50	4.30

- These forecasts are based around an expectation that there will normally be variations of +/-25bp during each quarter around these average forecasts in the normal economic and political circumstances. However, greater variations can occur should there be any unexpected shocks to financial and/or political systems.
- The PWLB has a margin over gilt yields of 80 bps on loans to local authorities, consideration has been given to sourcing funding at cheaper rates. The Council will evaluate the option of borrowing further from the bond markets during 2025/26. Borrowing from the bond market will take place if it offers greater value for money than borrowing from the PWLB. The degree to which any option proves cheaper than PWLB Certainty Rate and the changes to criteria is still evolving at the time of writing and further updates will be provided.
- Against this background and the risks within the economic forecast, caution will be adopted with the 2025/26 treasury operations. The Section 151 Officer will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:
  - If it was felt that there was a significant risk of a sharp fall in long and short term rates (e.g. due to a marked increase of risks around relapse into recession or of risks of deflation), then long term borrowings will be postponed, and potential rescheduling from fixed rate funding into short term borrowing will be considered.
  - If it was felt that there was a significant risk of a much sharper rise in long and short term rates than that currently forecast, perhaps arising from an acceleration in the rate of increase in central rates in the USA and UK, an increase in world economic activity or a sudden increase in inflation risks, then the portfolio position will be reappraised. Most likely, fixed rate funding will be drawn whilst interest rates are still lower than they are projected to be in the next few years.
- There will remain a cost of carry to any new long-term borrowing that causes a temporary increase in cash balances as this position will, most likely, incur a revenue cost the difference between borrowing costs and investment returns. The Council's policy for 2025/26 will be to balance investments to obtain returns within the Council's risk appetite. However, an assessment of the opportunity for borrowing will be made on the cost of borrowing long-term, within forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.
- The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be in respect of known needs, having regard to the Capital Strategy, after having regard also to the need to ensure value for money and the security of suchfunds.
- All borrowing transactions will be reported to the Audit and Corporate Governance Committee in their quarterly monitoring reports / outturn report / mid-year review report.

#### 7. DEBT RESCHEDULING

- 7.1 Rescheduling of current borrowing in our debt portfolio is likely to occur as currently opportunities are available to the Council in terms of a discount cashflow savings benefits due to interest rates continuing to rise.
- 72 The reasons for any rescheduling to take place will include:
  - (a) The generation of cash savings and/or discounted cashflow savings;
  - (b) To help fulfil the borrowing strategy outlined above;
  - (c) To enhance the balance of the portfolio (amending the maturity profile and/or the balance of volatility).
- All rescheduling will be reported to the Audit and Corporate Governance Committee in the next periods quarterly monitoring report.

#### 8. TREASURY POLICY STATEMENT

- The Treasury Management Policy Statement sets out the policies and objectives of Treasury Management Activities which is revised annually. It reflects December 2021 guidance.
- 82 In accordance with the CIPFA TM Code, the Council defines treasury management activities as:

"The management of the council's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

- 'Investments' are described within the latest Investment Guidance as covering all of the financial assets of the organisation, as well as other non-financial assets which the organisation holds primarily or partially for financial returns, such as investment property portfolios. To the extent that this recommendation includes investments which are not managed as part of normal treasury management activity, the relevant Council Policy detail is contained within their Investment Strategy.
- The Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. The Council's Treasury Management Practices Statement will cover the management of Treasury Manage Risk.
- The Council acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.
- The Council will create and maintain, as the cornerstone for effective treasury management:

- A Treasury Policy Statement, setting out the policies, objectives and approach to risk management of its treasury management activities
- Suitable Treasury Management Practices (TMPs) setting out the manner in which the Council will seek to achieve those policies and objectives, and prescribing how it will manage and control those activities (reported to the Audit & Corporate Governance Committee annually)
- Treasury Management Prudential Indicators as determined by the recommendations of the CIPFA Prudential Code;
- The content of the Policy Statement and TMPs will follow the recommendations contained in Sections 6 and 7 of the TM Code, subject only to amendment where necessary to reflect the particular circumstances of this organisation. Such amendments will not result in the organisation materially deviating from the TM Code's key principles.
- The Council will receive reports on its treasury management policies, practices and activities, including as a minimum, an annual strategy and plan in advance of theyear, an annual report after its close and a half year review report.
- The Council delegates responsibility for the implementation and monitoring of its treasury management policies and practices to the Audit & Corporate Governance Committee, and for the execution and administration of treasury management decisions to the Section 151 Officer, who is a CIPFA member, and will act in accordance with the Council's Treasury Management Strategy, having regard to the TM Code and CIPFA's Standard of Professional Practice on Treasury Management.

## 2025/26 ANNUAL INVESTMENT STRATEGY

#### 9. INTRODUCTION

- 9.1 The aim of the Council's Investment strategy is to:
  - Maintain the principal amount of sums invested;
  - Maintain policy flexibility.
- The Council's Section 151 Officer, under delegated powers, will undertake the most appropriate form of investments made in reliance upon S.12, Local Government Act 2003 (LGA) depending on the prevailing interest rates at the time, and taking into account the risks and the security, liquidity, yield and ESG of those investments
- 93 The Council invests surplus cash balances only with certain approved organisations, as security of funds is of primary importance. All investments will be made in accordance with the Council's investment policies and prevailing legislation and regulations.

#### 10. INVESTMENT POLICY - Management of Risk

- 10.1 The Ministry of Housing, Communities and Local Government (MHCLG) this was formerly the Department of Levelling Up, Housing and Communities (DLUHC) and CIPFA have extended their recommendation regarding the meaning of 'investments' to include both financial and non-financial investments. This report deals solely with treasury (financial) investments, as managed by the treasury management team. Non-financial investments, are covered in the Capital Strategy.
- 102 When making a S.12 investment, the Council will have regard to:
  - MHCLG Guidance on Local Government Investments ("the Guidance")
  - CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2021 ("the CIPFA TM Code")
  - CIPFA Treasury Management Guidance Notes 2021.
- 103 The Council's investment priorities in order are:
  - (a) The security of the principal amounts invested.
  - (b) The liquidity of its "specified" treasury management investments (funds, reserves and cash balances)
  - (c) Yield
  - (d) ESG Impact (covering environmental, social and governance)
- The Council will also aim to achieve the optimum return on its investments, commensurate with proper levels of security and liquidity and in line with the Council's risk appetite. In the current economic climate, it is considered appropriate in general to keep new treasury management investments short term to cover cash flow needs in high credit rated institutions. However, where appropriate the Council will also consider the value available in longer periods.

- The Council has reviewed its classification with financial institutions under Market in Financial Instruments Directive (MIFID II). A schedule has been included with the Treasury Management Practices document of those organisations with which it is registered as a professional client and those with which it has an application outstanding to register as a professional client.
- In accordance with guidance from MHCLG and CIPFA, which places a high priority on the management of risk, the Council has stipulated the minimum acceptable credit quality of counterparties for inclusion on the lending list, which also enable diversification and thus avoidance of concentration risk.
- 10.7 Furthermore, the Council's officers recognise that ratings should not be the sole determinant of the quality of an institution and that it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To this end the Council will engage with its advisors to maintain and monitor on market pricing such as "credit default swaps" and overlay that information on top of the credit ratings. This is integrated into the credit methodology provided by the advisors, MUFG Corporate Markets in producing its colour coding which show the varying degrees of suggested creditworthiness.
- The Council's officers also recognise that there are other risks of material importance to the treasury portfolio from an environmental, social and governance perspective. It is important, therefore, to assess these risks as well and to understand if these create potential longer-term financial and reputational risks for the Council, and if there are any commonalities with the Council's key objectives in this regard. To this end, the Council will use information sources and its advisors as appropriate to assist in scrutinising and understanding if these might affect the suitability of potential counterparties.
- 109 Other information sources used will include the financial press, share price and other such information pertaining to the banking sector, in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.
- 10.10 The aim of the strategy is to generate a list of highly creditworthy counterparties, which will also enable diversification and thus avoidance of concentration risk. The intention of the strategy is to provide security of investment, minimisation of all risks and alignment where possible with the Council's policy objectives.
- 10.11 Investment instruments identified for use in the financial year are listed below under the 'Specified' and 'Non-Specified' investments categories. Counterparty limits will be as set through the Council's Treasury Management Practices Statement.

## 11. SPECIFIED INVESTMENTS (MATURITIES UP TO ONE YEAR) AND COUNTERPARTY LIMITS

All such investments will be sterling denominated, with maturities up to maximum of 1 year, meeting the minimum 'high' rating criteria where applicable. The maximum limit will be applied to each account (i.e., bank, local authority, bond, etc.).

1. Specified Investments (limit per counterparty)	Maximum Group Limit
UK Government	Unlimited
Local Authorities	£20m
Money Market Funds CNAV (AAA Credit Rating)	£75m
Money Market Funds LVNAV (AAA Credit Rating)	£75m
Money Market Funds VNAV (AAA Credit Rating)	£75m

All investments with maturities up to maximum 1 year, high credit criteria:					
	Minimum 'High' Credit Criteria	Maximum Limit	Maximum Maturity Period		
Debt Management Agency Deposit Facility	UK sovereign rating	£50m	1 year		
Term deposits – local authorities and other public institutions	UK sovereign rating	£20m	1 year		
Rated UK building societies	A-A-	£5m	1 year		

## 112 Term deposits with banks

	Minimum 'High' Credit Criteria	Maximum Limit	Maximum Maturity Period
UK Banks	AAA/A-	£75m	1 year
Non UK Banks	AAA/A-	£10m	1 year

<sup>\*</sup>The countries approved for investing with their banks: Australia, Canada, Denmark, Germany, Luxembourg, Netherlands, Norway, Singapore, Sweden, Switzerland, Finland, USA, Abu Dhabi (UAE), Hong Kong, France, UK, Belgium, and Qatar.

#### 11.3 Other instruments

	Minimum 'High' Credit Criteria	Max Individual Investment	Maximum Total Investment	Max Maturity Period	
Certificates of deposits issued by banks and building societies	UK sovereign rating	£5m	£20m	1 year	
UK Government (Gilts/T-Bills/Repos)	UK sovereign rating	Unlimited	Unlimited	1 year	
Supra-national Banks, European Agencies Investment instruments	AA/Aa/AA	£10m	£20m	1 year	
Covered Bonds	AA/Aa/AA	£5m	£10m	1 year	
Bond Funds	AAA/BBB	£10m per fund		1 year / rolling	
Managed Account	AAA / BBB or sovereign Rating of investments	£20m per fund Unlimited UK ( (Gilts/T-bills /	1 year / rolling		

## 12. NON-SPECIFIED INVESTMENTS (MATURITIES OVER ONE YEAR)

- 12.1 These are any investments which do not meet the specified investment criteria. The investments may be for periods in excess of one year, and/or more complex instruments which require greater consideration before being authorised.
- 122 A maximum of 95% may be held in aggregate in non-specified investments. A variety of investment instruments will be used both debt and equity subject to the credit quality of the institution, and depending on the type of investment made it will fall into one of the above categories. The criteria, time limits and monetary limits applying to institutions or investment vehicles are:

Term deposits with nationalised banks and building societies:								
	Minimum 'High' Credit Criteria	Maximum Limit	Maximum Maturity Period					
UK Banks	AAA/A-	£20m	5 year					
Non-UK Bank	AAA/A-	£10m	5 year					

# 123 Maturities of any period:

	Minimum 'High' Credit Criteria	Maximum Individual Investment	Maximum Group Limit	Maximum Maturity Period
Corporate Bonds Corporate Bond Funds / Gilt Funds	AAA/BBB	£20m	£20m	5 years
Covered Bonds	AA+ - A-	£10m	£10m	5 years
Churches, Charities and Local Authorities (CCLA) Property Fund	Internal and External Due Diligence	£20m	£20m	1 year rolling

# 124 Maturities in excess of 1 year:

	Minimum 'High' Credit Criteria	Maximum Individual Limit	Maximum Group Limit	Maximum Maturity Period		
Term deposits – local authorities and other public institutions	UK sovereign rating	£20m	£20m	3 years		
Certificates of deposits issued by banks	UK sovereign rating	£5m	£20m	3 years		
UK Government Gilts	UK sovereign rating	£5m	£50m	5 years		
Bonds issued by multilateral development banks	AAA/AA	£5m	£20m	5 years		
Green Energy / Climate Change Bonds	Internal and External Due Diligence	£10m	£10m Less than 25% of the total project investment or maximum £10m per bond.	5 years		
Sovereign bond issues (i.e., other than the UK government)	UK sovereign rating	£5m	£20m	5 years		
Live Wire Community Energy	Internal Due Diligence	£0.5m	£0.5m	5 years		
Loan Notes	Internal and External Due Diligence	£30m	£50m	5 years		
Equity, property, multi asset or credit Pooled Funds	Internal and External Due Diligence	£40m	£50m	5 years		
Altana Social Impact Partnership	Internal & External Due Diligence	£20m	£20m	5 years		
Real Estate Investment Trusts (REITS)	Internal & External Due Diligence	£10m	£10m	5 years		
Bank Tier 2 Capital Both upper & lower levels	Rated & unrated Internal and External Due Diligence	£10m	£10m	10 years		

- Fitch Ratings' long-term credit ratings are assigned on an alphabetic scale from 'AAA' to 'D', first introduced in 1924 and later adopted and licensed by S&P. Like S&P, Fitch also uses intermediate +/- modifiers for each category between AA and CCC (e.g., AA+, AA, AA-, A+, A, A-, BBB+, BBB-, etc.).
- As a result of the change in accounting standards for 2022/23 under IFRS 9, the Council will consider the implications of investment instruments which could result in an adverse movement in the value of the amount invested and resultant charges at the end of the year to the General Fund. In November 2018, the MHCLG concluded a consultation for a temporary override to allow English local authorities time to adjust their portfolio of all pooled investments by announcing a statutory override to delay implementation of IFRS 9 for five years commencing from 1 April 2018, ending 31 March 2023. MHCLG extended the override for a further two years in December 2022 until February 2025. In the Provisional Local government Finance Settlement 2025/26 the Government announced it would end the FRS9 over-ride from financial year 2025/26 this is still being consulted on and the final outcome will not be known until the Final Local Government Finance Settlement is announced in February 2025. The Council have forecast the estimated cost to the Council of the abolishing of the over-ride to be £4m and a reserve has been set up to mitigate this.

#### 13 CREDITWORTHINESS POLICY

- This Council uses the creditworthiness service provided by MUFG Corporate Markets. This service employs a sophisticated modelling approach utilising credit ratings from all three rating agencies Fitch, Moody's and Standard and Poor's (S&P). The credit ratings of counterparties are supplemented with the following overlays:
  - Credit watches and credit outlooks from credit rating agencies;
  - Credit Default Swap (CDS) spreads to give early warning of likely changes in credit ratings;
  - Sovereign ratings to select counterparties from only the most creditworthy countries.
- This modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads for which the end product is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the Council to determine the suggested duration for investments on some occasions.
- The selection of counterparties with a high level of creditworthiness will be achieved by selection of institutions down to a minimum durational band within MUFG Corporate Markets weekly credit list of worldwide potential counterparties. The Council will therefore use counterparties within the following durational bands:

Colour	Suggested Duration
Yellow	5 years *
Dark Pink	5 years for Ultra-Short Dated Bond Funds with a credit score of 1.25
Light Pink	5 years for Ultra-Short Dated Bond Funds with a credit score of 1.5
Purple	2 years

Blue	1 year (only applies to nationalised or semi nationalised UK Banks)
Orange	1 year
Red	6 months
Green	100 days
No colour	Not to be used

<sup>\*</sup>The yellow colour category is for UK Government debt, or its equivalent, money market funds and collateralised deposits where the collateral is UK Government debt.

- 13.4 The MUFG Corporate Markets creditworthiness service uses a wider array of information than just primary ratings. Furthermore, by using a risk weighted scoring system; it does not give undue preponderance to just one agency's ratings.
- 135 Typically, the minimum credit ratings criteria the Council use will be a short term rating (Fitch or equivalent) of F1 and a long term rating of A-. There may be occasions when the counterparty ratings from one rating agency are marginally lower than these ratings but may still be used. In these instances, consideration will be given to the whole range of ratings available, or other topical market information, to support their use.
- All credit ratings will be monitored weekly. The Council is alerted to changes to ratings of all three agencies through its use of the MUFG Corporate Markets creditworthiness service:
  - If a downgrade results in the counterparty/investment scheme no longer meeting the Council's minimum criteria, its further use as a new investment will be withdrawn immediately;
  - In addition to the use of Credit Ratings the Council will be advised of information in movements in Credit Default Swap (CDS) against the iTraxx (CDS product brand name) benchmark and other market data on a weekly basis. Extreme market movements may result in downgrade of an institution or removal from the Councils lending list.
- 13.7 Sole reliance will not be placed on the use of this external service. In addition, this Council will also use market data and information, information on any external support for banks and the credit ratings of that government support.
- 138 **Creditworthiness** –Significant levels of downgrades to short and long-term credit ratings have not materialised since the crisis in March 2020. In the main, where they did change, any alterations were limited to outlooks. Nonetheless, when setting minimum sovereign debt ratings, this Authority will not set a minimum rating for the UK.
- 139 CDS prices –Although bank CDS prices, (these are market indicators of credit risk), spiked upwards during the days of the Truss/Kwarteng government, they have returned to more average levels since then. However, sentiment can easily shift, so it will remain important to undertake continual monitoring of all aspects of risk and return in the current circumstances. MUFG monitor CDS prices as part of their creditworthiness service to local authorities and the Authority has access to this information via its MUFG-provided Passport portal.

#### 14. COUNTRY LIMITS

14.1 The Council has determined that it will only use approved counterparties from countries with a minimum sovereign credit rating of AA- from Fitch Ratings (or equivalent from other agencies if Fitch does not provide them). The list will be added to, or deducted from by officers should ratings change in accordance with this policy.

#### 15. INTEREST RATE OUTLOOK

The below table provided by MUFG Corporate Markets is their interest rate view for the period of 2024-2027. PWLB forecasts are based on PWLB certainty rates.

Link Group Interest Rate View	11.11.24												
	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27
BANK RATE	4.75	4.50	4.25	4.00	4.00	3.75	3.75	3.75	3.50	3.50	3.50	3.50	3.50
3 month ave earnings	4.70	4.50	4.30	4.00	4.00	4.00	3.80	3.80	3.80	3.50	3.50	3.50	3.50
6 month ave earnings	4.70	4.40	4.20	3.90	3.90	3.90	3.80	3.80	3.80	3.50	3.50	3.50	3.50
12 month ave earnings	4.70	4.40	4.20	3.90	3.90	3.90	3.80	3.80	3.80	3.50	3.50	3.50	3.50

#### 16. LIQUIDITY OF INVESTMENTS

- 16.1 The maximum period of investment of treasury balances will be ten years.
- There will be no more than £30m of core treasury funds committed for a period over five years.

#### 17. FINANCIAL DERIVATIVES

- 17.1 Local authorities have previously made use of financial derivatives embedded into loans and investments both to reduce interest rate risk (e.g., interest rate collars and forward deals) and to reduce costs or increase income at the expense of greater risk (e.g. LOBO loans and callable deposits). The GPOC arising from Section 1 of the Localism Act 2011 may have removed some uncertainty as to whether, and to what extent, local authorities are able to enter into "stand-alone" forms of derivative contract (i.e. those that are not embedded into a loan or investment). Should any such opportunity arise, the individual conditions/circumstances would be subjected to approve consideration processes.
- The Council will, as a general rule, only consider standalone financial derivatives (such as swaps, forwards, futures and options) where they can be clearly demonstrated to reduce the overall level of the financial risks that the Authority is exposed to. Additional risks presented, such as credit exposure to derivative counterparties, will be taken into account when determining the overall level of risk. Embedded derivatives, including those present in pooled funds and forward starting transactions, will not be subject to this policy, although the risks they present will be managed in line with the overall treasury risk management strategy.
- 17.3 In line with the CIPFA Code, the Council will seek external advice and will consider that

advice before entering into financial derivatives to ensure that it fully understands the implications.

#### 18. ENVIRONMENTAL SOCIAL & GOVERNANCE (ESG) POLICY

- 18.1 The Council is committed to being a responsible investor at all times. Responsible investment means to recognise the importance of the long-term health and stability of the financial markets, and to understand that this depends on key external non-financial factors, such as the environment, social stability and strong governance. Collectively, these factors are often referred to under the umbrella of ESG (Environmental, Social and Governance).
- The Council's objective is to recognise all these risks, to mitigate them where possible and thereby improve the security of its portfolio in the long-term.
- 183 Within these risks, the Council has identified climate change as a long-term, material and systemic financial risk with the potential to significantly impact the treasury portfolio and the Council's financial resilience over time. Therefore, the Council seeks to:
  - Minimise exposure to counterparties and investments heavily impacted by climate change risk;
  - Increase exposure to sectors, counterparties and investments, such as renewables, whose activities aid the transition to a lower carbon world and economy;
  - Contribute meaningfully to an improved economically sustainable future locally and nationally, without sacrificing security.
- This is not to downplay other non-financial risks. The Council sees positive social impact also as a key mitigation to aid long-term financial stability, and as a meaningful contribution to the local, regional and national economy. Good governance meanwhile is also critical to safeguarding the Council's reputational risk.
- 185 The Council's core ESG principles are set out below in full:
  - The Council recognises the potential impact of its counterparties and investments on the environment, workers, communities and society, as well as the potential impact of climate change on the counterparties, businesses into which the Council invests, the Council itself and its local economy and community.
  - The Council will and seek to ensure, where possible, its investment counterparties
    will act responsibly with respect to the environment, aiming for a sustainable
    approach to the use of resources, avoiding irresponsible disposal of hazardous
    products and unnecessary waste.
  - The Council and its counterparties will be non-discriminatory (whether on grounds of gender, race or disability), and adopt equality and diversity in their employment practices
  - The Council seeks to ensure it, and its counterparties, always respect human rights and ensure no exploitation of child labour.

- The Council and its counterparties will seek to act with integrity at all times in their dealings.
- The Council will seek to encourage positive ESG behaviour, engaging with counterparties and investments where appropriate to encourage best practice and drive change.
- The Council will comply with any industry standard ESG guidelines that may arise and otherwise, always seek to ensure best practices, actively managing ESG considerations and risks alongside its financial considerations and risks.
- 18.6 The Council will incorporate ESG issues into its analysis and decision making processes when considering the treasury portfolio and investments. The Council will seek to use data and analysis to determine the type and materiality of relevant issues for counterparties, and their alignment with the Council's core principles.
- 18.7 It is important to note that the Council shall invest on the collective basis of its investment priorities Security, Liquidity, Yield and ESG impact having considered all factors contributing to the risk of its counterparties and investments, including ESG factors to the extent these indirectly or directly impact on financial risk and return as well as the Council's broader policy objectives.
- The Council will also seek to report progress, providing transparency on the ESG profile and impact of its portfolio investments, and report progress semi-annually to the Audit and Corporate Governance Committee. These will be through supporting investments and counterparties aligned with the Council's objectives, reviewing the ESG policies of funds and counterparties where appropriate, and the sourcing of suitable metrics where relevant, for example, social impact metrics, external ratings and quantifying the investments in assets and businesses contributing to climate change reduction.

#### 19. POLICY ON THE USE OF EXTERNAL SERVICE PROVIDERS

- 19.1 The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon our external service providers. All decisions will be undertaken with regards to all available information, including, but not solely, our treasury advisers.
- The Council also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented and subjected to regular review.
- 193 The Council fully appreciates the importance of monitoring the activity and resultant performance of its appointed external fund manager. The Council's external fund managers will comply with the Annual Investment Strategy. In order to aid this assessment, the Council is provided with a suite of regular reporting from its managers. This includes quarterly, semi-annual and annual reports, statements, access to online fund reporting sites, etc.
- 19.4 In addition to formal reports, the Treasury Management Risk Officer Group (TMRG) meets

with representative's fund managers who give presentations. These meetings allow for additional scrutiny of the manager's activity as well as discussions on the outlook for the fund as well as wider markets. The group also recommend investing or not in new investment instruments providing an additional level of governance.

195 Markets in Financial Instruments Directive – the Council has opted up to professional client status with its providers of financial services, including advisers, brokers, and fund managers, allowing it access to a greater range of services but without the greater regulatory protections afforded to individuals and small companies. Given the size and range of the Council's treasury management activities, the Section 151 Officer believes this to be the most appropriate status.

#### 20. TREASURY MANAGEMENT SCHEME OF DELEGATION

- 20.1 The scheme of delegation is in the Council's Treasury Management Practices Statement which will be reported to the Audit and Corporate Governance Committee on an annual basis for approval.
- The Council considers it essential, for the purposes of the effective control and monitoring of its Treasury Management activities, the reduction of the risk of fraud or error, and for the pursuit of optimum performance, that these activities are structured and managed in a fully integrated manner, and that the responsibilities of Treasury Management is always clear. A synopsis of the scheme of delegation is given below:

#### 20.3 Full Council

- approval of annual treasury management and investment strategies
- approval of the Mid-Year Review Report of Treasury Management
- approval of capital strategy
- monitoring of the yearly Treasury Outturn Report

#### 20.4 Audit and Corporate Governance Committee

- the body appointed by Council for the scrutiny of TreasuryManagement
- recommend the Council's Annual Treasury Management Strategy to Council
- receiving and reviewing quarterly monitoring reports
- recommending the yearly Mid-Year Review and Treasury Outturn Report to Council

#### 20.5 Section 151 Officer

The Section 151 Officer, and in their absence their appointed deputies, is the delegated responsible officer by Full Council for the operation of the Council's overall borrowing and investment activities. The Section 151 Officer will implement and monitor the Treasury Management Strategy and make recommendations to the responsible body. The role of the Section 151 Officer (as detailed in the 2021 Treasury Management Code) includes:

 Recommending clauses, treasury management policy/practices for approval, reviewing the same regularly and monitoring compliance

- Submitting regular treasury management policy reports
- Submitting budgets and budget variations
- Receiving and reviewing management information reports
- Reviewing the performance of the treasury management function
- Ensuring the adequacy of treasury management function
- Ensuring the adequacy of treasury management resources and skills and the effective division of responsibilities within the treasury management function
- Ensuring the adequacy of internal audit and liaising with external audit
- Recommending the appointment of external service providers
- Preparation of a capital strategy to include capital expenditure, capital financing,
   non- financial investments and treasury management, with a long-term timeframe
- Ensuring that the capital strategy is prudent, sustainable, affordable and prudent in the long term and provides value for money
- Ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the authority
- Ensuring that the authority has appropriate legal powers to undertake expenditure on non-financial assets and the financing
- Ensuring the proportionality of all investments so that the authority does not undertake a level of investing which exposes the authority to an excessive level of risk compared to its financial resources
- Making in year changes to the Treasury Management Strategy that must be reported to the Audit & Corporate Governance Committee and Full Council
- Ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and long term liabilities
- Provision to members of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans and financial guarantees
- Ensuring that members are adequately informed
- Ensuring that the authority has adequate expertise, whether in house or externally provided, to carry out the above
- Creation of Treasury Management Practices which specifically deal with how nontreasury investments will be carried out and managed, to include the following:
  - Risk management, including investment and risk management criteria for any material non-treasury investment portfolios
  - Performance measurement and management, including methodology and criteria for assessing the performance and success of non-treasury investments
  - Decision making, governance and organisation, including a statement of the governance requirements for decision making in relation to non-treasury investments; and arrangements to ensure that appropriate profession due diligence is carried out to support decision making
  - Reporting and management information, including where and how often monitoring reports are taken
  - Training and qualifications, including how the relevant knowledge and skills

#### 21. MINIMUM REVENUE PROVISION (MRP) STRATEGY

- The Minimum Revenue Provision (MRP) is a statutory charge that the Council is required to make from its revenue budget where the Council funds capital expenditure with debt.
- 21.2 Although there has been no statutory minimum since 2008, the Local Government Act 2003 requires the Council to have regard to the Ministry of Housing, Communities and Local Government's Guidance on Minimum Revenue Provision (the MHCLG Guidance) most recently issued in April 2024.
- 21.3 The MHCLG Guidance requires the Council to approve an Annual MRP Policy each year and provides a number of options for calculating a prudent amount of MRP but does not preclude the use of other appropriate methods.
- 21.4 MRP is calculated by reference to the Capital Financing Requirement (CFR) which is the total amount of past capital expenditure that has yet to be permanently financed, noting that debt must be repaid and therefore can only be a temporary form of funding. The CFR is calculated from the Council's balance sheet in accordance with the Chartered Institute of Public Finance and Accountancy's Prudential Code for Capital Expenditure in Local Authorities, 2021 edition. The Council will deduct loan amounts, leases and PFI payments from the CFR in calculating MRP as separate provision is made for these as evident in this strategy.
- One of the aims of this legislation is to ensure that the repayment of principal owed for Capital expenditure is charged on a prudent basis. Central Government guidance says:

"the broad aim of prudent provision is to ensure that debt is repaid over a period that is reasonably commensurate with that over which the Capital expenditure provides benefits"

- 21.6 The statutory change in the method for assessing a prudent provision reflected in general an intention to vary the earlier annual 4% charge in respect of outstanding capital debt liability to an annual charge, assessed in equal instalments, which spread future debt liability over a period bearing some relation to that which an "associated" asset is anticipated to provide a benefit for the Council (the asset life method).
- 21.7 The amount of capital debt liability that was outstanding at the time the statutory change was introduced was not subject to this revised beneficial life consideration. The MRP Guidance provided that this historic liability could either continue in accordance with the previous statutory method of assessment (referred to in the Guidance as Option 1) or be subject to local variation. The Council has approved a local variation which will result in this proportion of outstanding debt liability being charged more prudently by way of equal annual provision over a 50-year period
- 218 The Guidance suggests four options for charging amounts of outstanding capital debt liability:
  - Option 1: Regulatory method MRP is equal to the amount determined in accordance with

the former Regulations 28 and 29 of the 2003 Regulations.

Option 2: CFR method – MRP is equal to 4% of the non-housing CFR at the end of the preceding financial year.

Option 3: Asset Life Method – MRP is to be determined by reference to the useful life of the asset. The straight line method or annuity method can be used.

Option 4: Depreciation method – MRP is deemed to be equal to the provision required in accordance with deprecation accounting in respect of the asset on which expenditure has been financed by borrowing or credit arrangements.

- 21.9 As indicated, the Council has adopted a local determined option in respect of the historical element of debt liability. For most of its future capital debt liability arising from capital expenditure, the Council has determined to adopt Option 3. This reflects the asset "useful life" approach. MRP on expenditure not related to fixed assets but which has been capitalised by regulation or direction will be charged over 20 years in line with Guidance. The Council may separately determine different approaches should this be considered appropriate.
- 21.10 The determination of which expenditure should be charged under Option 3, and the life periods considered to be applicable to these, will in general be carried out under delegated powers by the Section 151 Officer and will be based on certainty / risk of future income streams and the level of exposure to long term debt. Any variation from Guidance suggestions will be specifically considered and agreed by the Audit & Corporate Governance Committee and Full Council.
- 21.11 A prudent provision will not be considered for new amounts of debt liability until the year following that in which the scheme or asset giving rise to the debt liability has commenced, providing the level of service or similar benefit for the Council that formed a significant element of the reason(s) and management intent for entering into the scheme. For example, in cases where future levels of anticipated income are either known to be subject to an introductory development period or delayed due to recognisable implementation of delay factors.
- 21.12 Items of capital debt liability will only be considered for division into separate amount(s) in cases where two or more major components have substantially different useful economic lives. Assets will not be transferred into the asset register and fixed assets account until their anticipated service benefit objectives are achieved, in accordance with proper practices.
- 21.13 In the case of loans treated as capital expenditure which give rise to a capital debt liability, the Council has determined that, in general, it will reflect a prudent approach if no amount of MRP is charged where there is reasonable or actual expectation of principal repayment(s) being made either during the currency of the maximum loan period (e.g. through tranches of principal repayment) or where the maturity date offers sufficient expectation of full principal repayment within a reasonable period.
- 21.14 Regulation 27(4) allows a local authority to exclude capital loans that are financed by debt from the requirement to make MRP and thus deduct it from the CFR in calculating MRP provided the loan is not a commercial loan. MRP for loans will be equated to the principal

repayment profile of the loans. Where an actual or expected credit loss has been recognised on any capital loan during the year then MRP will be provided. The MRP charge in the year will not be less than the credit loss amount, however it can be reduced by the value of previous amounts provided to write down the CFR on that loan.

- 21.15 For capital loans made on or after 7 May 2024 where an expected credit loss is recognised during the year, the MRP charge in respect of the loan will be no lower than the loss recognised. Where expected credit losses are reversed, for example on the eventual repayment of the loan, this will be treated as an overpayment (Regulation 28(2)).
- 21.16 For capital loans made before 7 May 2024 and for loans where expected credit losses are not applicable, where a shortfall in capital receipts is anticipated, MRP will be charged to cover that shortfall over the remaining life of the assets funded by the loan.
- 21.17 Prudent MRP will be determined with respect to the Authority's total capital financing requirement.
- 21.18 With regards to the Golden Square Shopping Centre Instead of relying solely upon principal element of repayments to satisfy the MRP liability, the annual MRP charge that will be made will equate to the principal amount that has been assessed by the Council's advisers, Price Waterhouse Coopers, to be included each year within the repayments received by the Authority under the lease. Rather than resulting in a fixed annual MRP charge over the period of the lease, the nominal amount of MRP charge each year will be regarded as met by the element of the lease rental which serves to write down the outstanding long term debtor created as a consequence of the lease having been granted. The deferred capital receipt created under this arrangement will be earmarked on a yearly basis to pay off the debt liability over 200 years and will equate to the MRP charge. This approach mirrors that which is recommended within paragraph 20 of the MRP Guidance with regard to leases where the authority is a lessee.
- 21.19 For assets acquired by finance leases or the Private Finance Initiative, MRP will be determined as being equal to the element of the rent or charge that goes to write down the balance sheet liability. These will be deducted from the CFR when calculating MRP in line with section 66 of Guidance
- 21.20 The Council, if it considers it prudent for a particular financial year, will set aside capital receipts, to reduce outstanding aggregate capital debt liability. But capital receipts will not be used in lieu of a prudent charge to revenue.
- 21.21 For capital receipts, the proceeds from the sale of capital assets are classed as capital receipts and are typically used to finance new capital expenditure. Where the Council decides instead to use capital receipts to repay debt and hence reduce the CFR, the calculation of MRP will be adjusted as follows:
- 21.22 Capital receipts arising on the repayment of principal on capital loans to third parties will be used to lower the MRP charge in respect of the same loans in the year of receipt, if any.

Capital receipts arising on the repayment of principal on finance lease receivables will be used to lower the MRP charge in respect of the acquisition of the asset subject to the lease in the year of receipt, if any.

Capital receipts arising from other assets which form an identified part of the Council's MRP calculations will be used to reduce the MRP charge in respect of the same assets over their remaining useful lives, starting in the year after the receipt is applied.

Any other capital receipts applied to repay debt will be used to reduce MRP in equal instalments starting in the year after receipt is applied.

- 21.23 Redwood Bank The Council has also noted that the likely life period of their equity holding in Redwood Bank will be considerably longer than might apply to more common forms of share capital acquisitions, which are likely to be more representative of investments rather than assets that provide an economic regeneration. For this reason, the Council has determined it will depart from the wording of the Guidance, which suggests a 20-year life period, and agreed that it would be prudent to determine a 50-year life period for this asset in recognition of the anticipated benefit period. The Council will thus charge MRP on the asset over 45 years to reflect the previous five year MRP holiday the Council have previously taken.
- 21.24 Commercial Property Investment Programme The Council will make a voluntary MRP charge using the Annuity method which is recommended by Guidance. This approach was agreed in a detailed paper to the Audit & Corporate Governance Committee at their meeting of 10 February 2022. MRP will be charged over 50 years or the lease length of the investment. Alternative periods may be used if advised by qualified surveyors on a different asset life.
- 21.25 Time Square MRP for Time Square will be payable for the first time in 2024/25. The Council for the previous five years took a five year MRP holiday departing from Guidance. This was considered prudent at the time so the asset could recover from the devasting effects of Covid. To reflect this the remaining MRP will be charged over 45 years. The Council will charge MRP on an Annuity Basis in line with Guidance. Time Square is an economic regeneration scheme, and the annuity method is recognised as being an acceptable method for economic regeneration schemes
- 21.26 This MRP policy will be reviewed on an annual basis. If it is proposed to vary the terms of the agreed Policy Statement during any year, a revised statement will be submitted to the Audit and Corporate Governance Committee for consideration at that time.
- 21.27 The Council will have its MRP Policy Independently Reviewed in 2025/26 and will report the finds to The Audit & Corporate Governance Committee.

### 22. LOAN REPAYMENTS

22.1 The Council is committed to reducing its debt over the medium term when commercial property is sold, and loans are repaid. The Section 151 Officer will make an informed judgment on how best to achieve long-term value from any premature repayments of loans whilst also maintaining the flexibility to use capital receipts to fund naturally maturing loans.

#### 23. INTERNATIONAL FINANCIAL REPORTING STANDARD 9 (IFRS 9)

23.1 The Government announced in the Final 2025/26 Local Government Finance Settlement on 3 February 2025, that it will not be extending the IFRS over-ride beyond 2024/25. The Council will monitor the valuation of its investments on an on-going basis and will create a

reserve to mitigate future investment valuation losses.

# **GLOSSARY OF TERMS**

5
e
h
n
n.
ة
t
ce
f
e
- i - i

CIPFA	Chartered Institute of Public Finance and Accountancy
CLG	Department for Communities and Local Government
СРІ	Consumer Price Index – calculated by collecting and comparing prices of a
	set basket of goods and services as bought by a typical consumer, at
	regular intervals over time. The CPI covers some items that are not in the
	RPI, such as unit trust and stockbroker's fees, university
Dala Maria	accommodation fees and foreign students' university tuition fees.
Debt Management	Government body that offers fixed term deposits.
Agency Deposit Facility	
Derivative	A contract whose value is based on the performance of an underlying
	financial asset, index or other investment, e.g. an option is a derivative
	because its value changes in relation to the performance of an underlying
	stock.
MHCLG	Ministry of Housing, Communities and Local Government-
DMADF	Deposit Account offered by the Debt Management Office, guaranteed by the UK government.
ECB	European Central Bank – sets the central interest rates in the EMU area.
	The ECB determines the targets itself for its interest rate setting policy;
	this is to keep inflation within a band of 0 to 2%. It does not accept that
	monetary policy is to be used to manage fluctuations in unemployment
	and growth caused by the business cycle.
EIA	Equality Impact Assessment
EMU	European Monetary Union
Equity	A share in a company with limited liability. It generally enables the holder
	to share in the profitability of the company through dividend payments
	and capital gain.
EU	European Union
Fed.	Federal Reserve Bank of America – sets the central rates in the USA
<b>Floating Rate Notes</b>	Bonds on which the rate of interest is established periodically with
(FRN)	reference to short-term interest rates
Forward Deal	The act of agreeing today to deposit funds with an institution for an
	agreed time limit, on an agreed future date, at an agreed rate.
Forward Deposits	Same as forward dealing (above).
FCA	Financial Conduct Authority – one of the main UK regulatory bodies with
	three main objectives – to protect consumers, to protect and enhance the
	integrity of financial markets and to promote effective competition.
Fiscal Policy	The Government policy on taxation and welfare payments.
GDP	Gross Domestic Product
GF	General Fund
Gilt	Registered British government securities giving the investor an absolute
	commitment from the government to honour the debt that those
- I	securities represent.
Gilt Funds	Pooled fund investing in bonds guaranteed by the UK government.
Government MMF	MMFs that invest solely in government securities, or reverse repurchase
	agreements backed by Government Securities.
GPOC	General Power of Competence
HM Treasury	Her Majesty's Treasury
HRA	Housing Revenue Account

IFRS	International Financial Reporting Standards
IMF	International Monetary Fund
IMP	Investment Management Practices for Non-Treasury Investments
iTraxx	The brand name for the group of credit default swaps index products.
LOBO's	Lenders Option Borrowers Option loans
LFS	Labour Force Survey
Loan Notes	Loan notes are a financial instrument which detail when a loan must be
	repaid by the borrower and what interest is payable to the lender. Loan
	notes are often used as a way of investing in a company or property
	transaction.
LGA	Local Government Association
LTI	Long Term Investments (Commercial / Pooled Funds) more than 365 days
LVNAV MMF (Low	Low Volatility Net Asset Value (LVNAV) MMFs are short-term MMFs.
Volatility Net Asset	Funds are primarily invested in money market instruments, deposits and
Value)	other short-term assets. Units in the fund are purchased or redeemed at a
	constant price so long as the value of the underlying assets do not deviate
	by more than 0.2% (20bps) from par (i.e. 1.00).
Managed Account	Council's owned account containing treasury bills, bonds and other low risk investment instruments.
MiFID	Markets in Financial Instruments Directive is a regulation that increases
	the transparency across the European Union's financial markets and
	standardises the regulatory disclosures required for particular markets.
	The directive has been in force across the European Union (EU) since 2008
Money Market Fund	A well rated, highly diversified pooled investment vehicle whose assets
(MMF)	mainly comprise of short term instruments. It is very similar to a unit
	trust, however in an MMF.
Monetary Policy	Government body that sets the bank rate (commonly referred to as being
committee	base rate). Their primary target is to keep inflation within plus or minus
(MPC)	1% of a central target of 2% in two years' time from the date of the
	monthly meeting of the Committee. Their secondary target is to support
	the Government in maintaining high and stable levels of growth and
	employment.
MRP	Minimum Revenue Provision – the annual charge to the revenue account
	of the prudent provision for the repayment of debt, incurred in respect of
	capital expenditure financed from borrowing or other long-term credit
MATER	arrangements.
MTFP	Medium Term Financial Plan
Open Ended	A diversified pooled investment vehicle, with a single purchase price,
Investment Companies	rather than a bid/offer spread.
OIS	Overnight Indexed Swap – an interest rate swap where the periodic
Ola	floating payment is generally based on a return calculated from a daily
	compound interest investment.
Other Bond Funds	Pooled funds investing in a wide range of bonds.
PAYE	Pay As You Earn
PFI	Private Finance Initiative
PWLB	Public Works Loan Board
QE	Quantitative Easing
~~-	Quantitative Easing

Reverse Gilt Repo	This is a transaction as seen from the point of view of the party which is
Reverse ont Repo	buying the gilts. In this case, one party buys gilts from the other and, at
	the same time and as part of the same transaction, commits to resell
	equivalent gilts on a specified future date, or at call, at a specified price.
Retail Price Index	Measurement of the monthly change in the average level of prices at the
(RPI)	retail level weighted by the average expenditure pattern of the average
(11111)	person.
Real Estate	A real estate investment trust (REIT) is a publicly traded company that
Investment Trust	owns, operates or finances income-producing properties.
(REIT)	owns, operates or manees meeting properties.
REPOS	In a repo, one party sells an asset (usually fixed-income securities) to
	another party at one price and commits to repurchase the same or
	another part of the same asset from the second party at a different price
	at a future date or (in the case of an open repo) on demand.
RPIX	As RPI but excluding mortgage interest rate movements.
RPIY	As RPI but excluding mortgage interest rate movements and changes in
	prices caused by changes in taxation.
SONIA	Sterling Overnight Index Average – SONIA is the effective reference
	overnight rate for unsecured transactions in the Sterling market
Sovereign Issues (Ex	Bonds issued or guaranteed by nation states but excluding UK
UK Gilts)	government bonds.
STI	Short Term Investments – less than 365 days
Supranational	Bonds issued by supranational bodies, e.g. European investment bank.
Bonds	These bonds – also known as Multilateral Development Bank bonds – are
	generally AAA rated and behave similarly to gilts, but pay a higher yield
	("spread") given their relative illiquidity when compared with gilts.
SORP	Statement of Recommended Practice
S151	Section 151 Officer
Term Deposit	A deposit held in a financial institution for a fixed term at a fixed rate.
TMP	Treasury Management Practice
Treasury Bill	Treasury bills are short term debt instruments issued by the UK or other
	governments. They provide a return to the investor by virtue of being
	issued at a discount to their final redemption value.
UBS	Union Bank of Switzerland
US	United States
Ultra-Short Dated	Fund designed to produce an enhance return over the above Money
Bond Fund (USDBF)	Market Fund (MMF). The manager may use a wide range of alternative
	options to try and generate excess performance.
VNAV	Variable Net Asset Value – refers to funds which use mark-to-market
	accounting to value some of the assets.
WARoR	Weighted Average Rate of Return is the average annualised rate of return
	weighted by the principal amount in each rate.
WAM	Weighted Average Time to Maturity is the average time, in days, till the
	portfolio matures, weighted by principal amount.
WATT	Weighted Average Total Time is the average time, in days, that deposits
	are lent out for, weighted by principal amount.
WA Risk	Weighted Average Credit Risk Number. Each institution is assigned a
1	
	colour corresponding to a suggested duration using Sector's Suggested Credit Methodology.

Model WARoR	Model Weighted Average Rate of Return is the WARoR that the model
	produces by taking into account the risks inherent in the portfolio.

#### **Annexe B - PRUDENTIAL INDICATORS**

Within the prudential indicators there are a number of key indicators to ensure that the Council operates its activities within defined limits.

The Council's capital investment plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

# A Capital Investments

For capital programme purposes, the Council makes a reasonable estimate of the capital debt liability, that it plans to incur or envisages will arise, in the following three years and after each year-end it will account for the actual capital expenditure incurred for each year.

The Council's capital programme informs the requirements of these indicators. In terms of the capital expenditure element of aggregate capital activity (which includes non-financial investments), the amounts incurred by the Council in 2022/23, the revised estimate for the current year and estimates for the future years are as follows:

2022/23	2022/23	2024/25		2024/25	2025/26	2026/27	2027/28	Forecast
Actual	Actual	MTFP	Capital Expenditure	Forecast	Estimate	Estimate	Estimate	Total
£m	£m	£m		£m	£m	£m	£m	£m
8.135	6.16	27.382	Families & Wellbeing	5.758	39.576	4.043	0.100	49.477
2.144	3.033	3.056	Corporate Services	3.916	2.569	0.745	ı	7.230
17.234	21.44	109.64	Environment & Transport	63.748	51.550	24.365	12.571	152.234
15.791	23.362	17.489	Growth	20.182	7.504	•	2.377	30.063
187.854	135.984	101.345	Invest to Save Programme (ItS)	71.474	73.592	41.250	43.632	229.948
	_							
231.158	189.979	258.912	Total Capital Expenditure	165.077	174.791	70.403	58.680	468.951

Invest to Save programme relates to areas such as capital expenditure on investment properties, loans to third parties, etc. Third year spend is historically low as it reflects future schemes that have not yet been identified and or added to the Capital Programme.

The table below summarises the above capital financing plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need:

2021/22	2022/23	2024/25		2024/25	2025/26	2026/27	2027/28	Forecast
Actual	Actual	MTFP	Capital Financing	Forecast	Estimate	Estimate	Estimate	Total
£m	£m	£m		£m	£m	£m	£m	£m
192.512	141.748	179.432	Unsupported Borrowing	81.783	111.316	61.356	50.733	305.188
35.574	36.044	71.836	Capital Grants and Reserves	28.433	55.510	4.875	7.479	96.297
1.366	1.872	3.183	Capital Receipts	49.670	0.902	2.150	-	52.722
0.291	0.699	4.461	External Funding	5.001	7.063	2.022	0.468	14.554
1.414	9.616		Revenue Funding	0.190	-	-	-	0.190
231.157	189.979	258.912	Total Capital Financing	165.077	174.791	70.403	58.680	468.951

## B Capital Financing Requirement – the Council's borrowing need

Another prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR represents the total historic outstanding capital investment debt liability which has not yet been paid charged to revenue or otherwise financed. It is essentially a measure of the Council's indebtedness and in turn their underlying borrowing need. Any capital financing liability which has not immediately been paid for through a revenue or capital resource, will increase the CFR.

The CFR does not increase indefinitely, as the minimum revenue provision (MRP) is a statutory annual revenue charge which broadly reduces the borrowing need in line with each asset's life, and so charges the economic consumption of capital assets as they are used. It may also be reduced by the setting aside of monies achieved from asset disposals.

The CFR includes any other long term liabilities (e.g. PFI schemes, finance leases). Whilst these increase the CFR, and therefore the Council's borrowing requirement, these types of schemes include a borrowing facility by the PFI, PPP lease provider and so the Council is not required to separately borrow for these schemes.

2024/25		2025/26	2026/27	2027/28
Forecast	Capital Financing Requirement (CFR)	Estimate	Estimate	Estimate
£m		£m	£m	£m
1772.700	CFR	1826.660	1828.589	1819.355
-107.093	Movement in CFR	52.511	2.063	-9.996
		-	-	
118.568	Financing need for the year	109.867	61.490	49.971
0	Over borrowed from previous year	0	0	0
-225.661	Less MRP & LTD	-57.356	-59.427	-59.967
		<u>-</u>		
-107.093	Net Movement in CFR	52.511	2.063	-9.996

A key aspect of the regulatory and professional guidance is that elected members are aware of the size and scope of any commercial activity in relation to the authority's overall financial position. The capital expenditure figures shown above demonstrate the scope of this activity and proportionality to the Council's remaining activity.

#### C Gross Borrowing Requirement

There is a clear linkage between the authority's capital financing requirement indicators and its gross external borrowing. Within the code there is a key indicator of prudence that ensures that, over the medium term, gross borrowing is only for a capital purpose. This can be demonstrated by comparing gross external borrowing shown in the table below to the total CFR in the preceding year plus the estimates of any additional CFR for the current and next two financial years. Gross external borrowing should not exceed this limit except in the short term. There is some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue purposes.

The Council's treasury portfolio position at 31 March 2023, with forward projections are summarised below. The table shows the actual external debt (the treasury management operation), against the underlying capital borrowing need (the Capital Financing

Requirement (CFR)), highlighting any over or under borrowing:

2022/23	2023/24	<b>Current Portfolio Position</b>	2024/25	2025/26	2026/27	2027/28
1647.665	1817.601	Debt at 1 April	1891.721	1609.107	1712.472	1761.437
169.936	74.120	Expected change in Debt	-282.614	103.365	48.965	49.988
1817.601	1891.721	External Debt at 31 March	1609.107	1712.472	1761.437	1811.425
1846.136	1916.578	Capital Financing Requirement	1772.700	1826.660	1828.589	1819.355
28.535	24.857	Under / (Over) borrowing	163.593	114.188	67.152	7.930

The Section 151 Officer reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

#### D Authorised Limit for External Debt

This is a key prudential indicator which represents a control on the maximum level of borrowing. This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

The authority has to set an Authorised Limit, which is the statutory maximum borrowing permitted, and an Operational Boundary, which is the normal level of borrowing expected, for external debt. This is a statutory limit determined under section 3(1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although this power has not yet been exercised.

The Authorised Limits set out below are consistent with the authority's current commitments, existing plans and the proposals set out in this report for the capital expenditure and financing, and with its approved treasury policy statement and practices. They are based on the most likely, prudent, but not worst case scenario, with sufficient headroom over and above this to allow for operational management recognising that during the year it may be necessary to exceed the operational boundary in order to take advantage of interest rate movements or to accommodate unusual cash flow movements.

2022/23	2023/24		2024/25	2025/26	2026/27	2027/28
Actual	Actual	Authorised Limit	Estimate	Estimate	Estimate	Estimate
£m	£m	for External Debt	£m	£m	£m	£m
1647.665	1817.600	Borrowing + 1.1%	1770.018	1883.719	1937.581	1992.568
3.367	3.212	Other Long Term Liabilities (PFI / Leasing)	3.046	2.867	2.675	2.470
1651.032	1820.812	Total Authorised Limit	1773.064	1886.586	1940.256	1995.038

This indicator being the maximum limit the Council may borrow at any point in time in the year. If borrowing above this level were needed a report would go to Council for authorisation to increase the limit.

# E Operational Boundary for External borrowing and other financing

The operational boundary is a key management tool for in-year monitoring. Temporary breach of the operational boundary will not in itself be a cause for concern, although a sustained breach might indicate an underlying issue that would need investigation and

action.

The Operational Boundaries below are based on the Authorised Limit, estimating the authority's most likely level of borrowing and leasing each year. It includes long term borrowing to fund capital and short term borrowing to meet day to day variations in cash flow but without the additional headroom.

This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR but may be lower or higher depending on the levels of actual debt and the ability to fund under-borrowing by other cash resources.

2022/23	2023/24		2024/25	2025/26	2026/27	2027/28
Actual	Actual	Operational Boundary	Estimate	Estimate	Estimate	Estimate
£m	£m	for External Debt	£m	£m	£m	£m
1647.665	1817.600	Borrowing + £10m	1619.107	1722.472	1771.437	1821.425
		Other Long Term Liabilities				
3.367	3.212	(PFI/Leasing)	3.046	2.867	2.675	2.470
		Total Operational				
1651.032	1820.812	Boundary	1622.153	1725.339	1774.112	1823.895

# Treasury management indicators for debt

There are three debt related treasury activity limits. The purpose of these is to restrain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest rates. However, if these are set to be too restrictive, they will impair the opportunities to reduce costs / improve performance. The indicators are:

#### F Maturity structure of borrowing

It is recommended that the Council sets upper and lower limits for the maturity structure of its debt for the forthcoming year as follows:

Maturity Structure	Lowe	er Limit	Uppe	r Limit
	Fixed	Variable	Fixed	Variable
Under 12 months	0%	0%	30%	40%
12 months to 2 years	0%	0%	30%	0%
2 years to 5 years	0%	0%	35%	0%
5 years to 10 years	0%	0%	30%	0%
10 years to 20 years	15%	0%	100%	0%
20 years to 30 years	15%	0%	100%	0%
30 years to 40 years	5%	0%	100%	0%
40 years and above	5%	0%	100%	0%

The above percentages are the ranges for the projected borrowing maturing in each year out of the total projected borrowing. The indicator is designed to be a control over the Council having large concentrations of fixed interest rate debt needing to be replaced at any one time and thus being at risk of having to borrow large amounts when interest rates may be unfavourable.

Please note that the maturity structure guidance for LOBO loans deems the maturity date to be the next call date which would account for £48.5m of the current loan portfolio. The loans have remained as the expected maturity date; however, these loans could potentially be called by the lender within the next six month period, but they are unlikely to do so due to the current low interest rate environment.

# **G** Fixed interest rate exposure

The table below shows the Council's upper limit for fixed interest rate exposure for the next three years. This indicator shows the percentage of borrowing that can be undertaken at fixed interest rates. Up to 100% of borrowing can be at fixed interest rates. Again, this indicator is set at levels to reduce the risk from interest rate movements.

Upper Limit –	2025/26	2026/27	2027/28
Fixed Interest Rate Exposure	%	%	%
Fixed Interest Rates	100	100	100

#### H Variable interest rate exposure

The following indicator shows the percentage of borrowing that can be undertaken at variable interest rates. The purpose of the indicator is to restrict variable rate borrowing in order to reduce the risk from sudden movements in interest rates. The Council sets its upper limit for borrowing, reflecting variable interest rates less investments that are variable rate investments at 40%.

Upper Limit –	2025/26	2026/27	2027/28
Variable Interest Rate Exposure	%	%	%
Variable Interest Rates	40	40	40

#### I Investment periods

It is recommended that the Council sets a limit on the amount invested for periods longer than one year of £80m for 2025/26 for treasury management investments, with the maximum period for any one investment being ten years. These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment and are based on the availability of funds after each year-end.

Upper Limit for Total Principal Sums Invested for over 365 days	2025/26 Estimate	2026/27 Estimate	•
	£m	£m	£m
Long Term Investment includes Pooled Funds	80	80	80

# L. Net income from commercial and service investments as a proportion of the net revenue stream

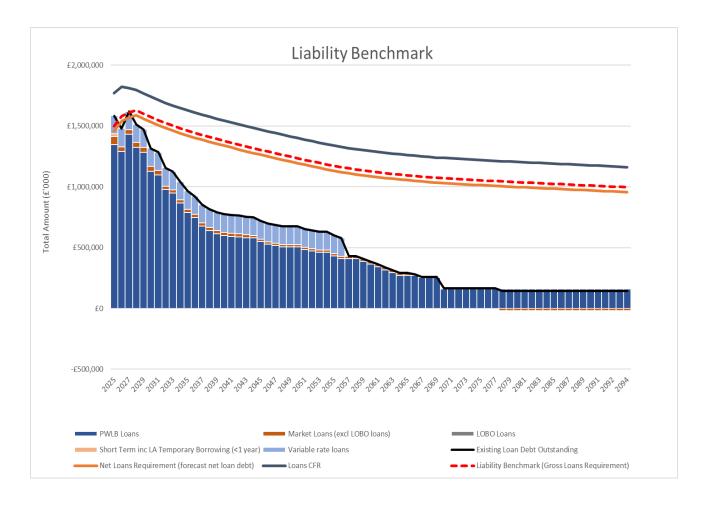

The indicator shows non-treasury investment income as a percentage of the net revenue stream of the Council.

# Agenda Item 5.1

	24/25 Estimate	25/26	26/27	27/28 Estimate
	£m	Estimate £m	Estimate £m	£m
Commercial Income & Service Investments	20.722	25.722	25.722	25.722
Net Service Expenditure (NSE)	194.292	208.892	210.481	212.032
Commercial income to NSE ratio	10.67%	12.31%	12.22%	12.13%

## M Liability Benchmark

The Prudential Code (2021 Edition) recommends the production of a liability benchmark, which is shown in the graph below. The liability benchmark is the level of expected external borrowing given current projections for capital investment up to year 2025/26. The projected borrowing levels show what the Council expects it level to be. Where the aggregate borrowing level is below the benchmark, the Council will be in an under-borrowed position, and when it is above it will be over-borrowed. This makes assumptions regarding repayment dates, and this can be used as a tool for scheduling future borrowing requirements.

The liability benchmark is the level of expected debt given current projections for capital expenditure up to year 2027/28 The projected debt levels show what the Council expects its debt level to be. Where the debt level is below the benchmark, the Council will be in an underborrowed position, and when it is above it will be over-borrowed.

In the graph above it shows a slightly over-borrowed position for the current period – this is mainly due to slippage in the capital programme and a high level of cash from redeeming borrowing.

This makes assumptions regarding repayment dates, and this can be used as a tool for scheduling future borrowing requirements.

The bars represent the maturity profile of current loans and the white space between the existing loans and the Net loan requirement is the borrowing requirement for future years.
